*Sustainable Crop Production* Mirza Hasanuzzaman, Masayuki Fujita, Marcelo Carvalho Minhoto Teixeira Filho, Thiago Assis Rodrigues Nogueira, Fernando Shintate Galindo, 2020-06-17 This book includes twenty one comprehensive chapters addressing various soil and crop management issues including modern techniques in enhancing crop production in the era of climate change. There are a few case studies and experimental evidence about these production systems in specific locations. Particular focus is provided on the state of the art of biotechnology, nanotechnology and precision agriculture as well as many other recent approaches in ensuring sustainable crop production. This book is useful for undergraduate and graduate students, teachers and researchers particularly in the fields of crop science, soil science and agronomy.

## **Rebuilding Higher Education Systems Impacted by Crises: Navigating Traumatic Events, Disasters, and More** Kayyali, Mustafa, 2024-04-05

The resilience and adaptability of higher education systems are under unprecedented strain. From natural disasters to pandemics and economic crises to political turmoil, universities and colleges worldwide have grappled with a myriad of crises that disrupt their core missions of teaching, research, and community engagement. As we find ourselves at the crossroads of these tumultuous times, the imperative to reconstruct and revitalize higher education systems becomes increasingly evident. *Rebuilding Higher Education Systems Impacted by Crises: Navigating Traumatic Events, Disasters, and More* is a pioneering work that addresses the critical issues surrounding the restoration of higher education systems in the wake of various crises. This book serves as a roadmap for educators, administrators, policymakers, and stakeholders who share a commitment to preserving and advancing higher education even in the face of adversity. The 21st century has witnessed a rapid escalation in the frequency and severity of crises affecting higher education institutions. These crises span from the abrupt shift to online learning necessitated by the COVID-19 pandemic to the enduring ramifications of climate change on campus infrastructure. Additional factors such as financial pressures, evolving demographics, and the ever-changing technological landscape further complicate the challenge. This book embarks on a deep exploration of these challenges and offers practical solutions, making it an indispensable resource for anyone vested in the future of higher education.

[Reimagining Effective Stakeholder Governance Practices in Higher Education](#) Felix Omal, 2023-06-22 This book examines the role of the university governing council and the changing nature of university governance using a case study from a South African university. The book considers the key challenging features of South African higher education in relation to current competing international trends in higher education governance. It shows how major decision makers within the university operate within competing governance knowledge domains to exercise good practice within turbulent institutional contexts. These diverse institutional cultures are examined in terms of their contribution to various governance practices, presenting an emerging model of university governance known as the structural systemic cultural model. Throwing light on the nature of challenges associated with the governance of universities in the post-apartheid era, this book will be of interest.
