Historical phonology of Mataguayan Andrey Nikulin , Javier Carol ,2024-10-29 This book discusses the phonological history of Mataguayan a language family that includes no less than four distinct languages Mak Niva le Chorote and Wich spoken by ca 65 000 individuals in the Southern Chaco region in Argentina Paraguay and Bolivia The book starts by offering a phonological reconstruction of Proto Mataguayan with separate chapters dedicated to its consonants vowels word level prosody and morphophonological alternations This is followed by an outline of the phonological evolution of each Mataguayan language all the way from Proto Mataguayan to contemporary lects with a special attention to the dialectal diversity of Niva le Chorote and Wich The study concludes with an etymological dictionary of Mataguayan where known cognate sets are accompanied by comments on phonetic irregularities semantic shifts possible cognates in the neighbouring Guaicuruan family and references to earlier studies

Universal Jurisdiction over Core International Crimes Lachezar Yanev,Harmen van der Wilt,2025-09-10 This timely book explores how the domestic courts of states across Europe North America and Oceania have defined and applied their substantive laws in universal jurisdiction trials for core international crimes It considers what universal justice actually looks like in the national courtrooms of diverse states and probes the extent to which there is uniformity in the pursuit to punish universally condemned crimes

The Obligation to Extradite Or Prosecute Kriangsak Kittichaisaree,2018 It was hoped that the creation of the International Criminal Court would enable the extradition and prosecution of crimes which shock the world Fifteen years later Kittichaisaree scrutinises the achievements and limitations of the court so far offering his own vision for ensuring that no international criminal escapes the eye of justice

Polymorphism in Molecular Crystals Joel Bernstein,2020-04-28 Most people are familiar with the fact that diamond and graphite are both composed only of carbon yet they have very different properties which result from the very different structures of the two solids they are polymorphs of carbon Understanding the relationship between the structures and the

properties of materials is of fundamental importance in developing and producing new materials with improved or new properties. The existence of polymorphic systems allows the direct study of the connection between structures and properties. This book provides grounding on the fundamental structural and energetic basis for polymorphism, the preparation and characterization of polymorphic substances, and its importance in the specific areas of pharmaceuticals, pigments, and high energy explosive materials. The closing chapter describes the intellectual property implications and some of the precedent patent litigations in which polymorphism has played a central role. The book contains over 2500 references to provide a ready entry into the relevant literature.

Design for Advanced Manufacturing: Technologies, and Processes LaRoux K. Gillespie, 2017-05-12. Cutting edge coverage of the new processes, materials, and technologies that are revolutionizing the manufacturing industry. Expertly edited by a past president of the Society of Manufacturing Engineers, this state of the art resource picks up where the bestselling *Design for Manufacturability Handbook* left off. Within its pages, readers will find detailed, clearly written coverage of the materials, technologies, and processes that have been developed and adopted in the manufacturing industry over the past sixteen years. More than this, the book also includes hard-to-find technical guidance and application information that can be used on the job to actually apply these cutting edge processes and technologies in a real world setting. Essential for manufacturing engineers and designers. *Design for Advanced Manufacturing* is enhanced by a host of international contributors, making the book a true global resource. Information on the latest technologies and processes such as 3D printing, nanotechnology, laser cutting, prototyping, additive manufacturing, and CAD/CAM software tools. Coverage of new materials including nano-smart and shape memory alloys, in steels, glass, plastics, and composites.
