Army Physical Security Manual:

Physical Security U.S. Department Of The Army, Training and Doctrine Command, 2010-08 Army Tactics Techniques and Procedures ATTP 3 39 32 provides doctrinal guidance for personnel who are responsible for planning and executing physical security programs. It is the basic reference for training security personnel and is intended to be used in conjunction with the Army Regulation AR 190 series Military Police Security Engineering Unified Facilities Criteria UFC publications Department of Defense DOD directives and other Department of the Army DA publications. This publication applies to the Active Army, the Army National Guard ARNG, Army National Guard of the United States ARNGUS and the United States Army Reserves USAR unless otherwise stated. Prevention and protection are the two primary concerns of physical security both serve the security interests of people equipment and property. This ATTP establishes physical security as a supporting component of the protection warfighting function and describes defensive measures that enable protection tasks such as operations security, antiterrorism, operational area security, survivability and information protection.

Security Field Manual Department of the Defense, Of Defense Department, 2002-04 This U S Army field manual FM 3 19 30 sets forth guidance for all personnel responsible for physical security. It is the basic reference for training security personnel. It is intended to be a one stop physical security source for the Department of Defense DOD the Department of the Army DA and other proponents and agencies of physical security. Prevention and protection are the two primary concerns of physical security. Both serve the security interests of people equipment and property. These interests must be supported at all staff and command levels and this support must be unified in joint, multinational and interagency operations. Support to joint, multinational and interagency operations relies on the fact that the Army will not conduct operations alone. Additionally, force projection operations conducted by the military will involve the integration of war fighting capabilities with stability and support operations. This manual's primary focus is the articulation of a balanced understanding of physical security for joint, multinational and interagency operations throughout the environments of peacetime, conflict and war. Physical security must integrate the various capabilities of joint, multinational and interagency operations in pursuit of a seamless connection between the strategic operational and tactical levels of war. Physical security must also address an expanded range of threats that embraces not only traditional threat components of war but also nontraditional threats generated by guerrillas, terrorists, criminals and natural or man made disasters. In addition, physical security must address the concept of Homeland Defense due to the aforementioned threats. Homeland Defense is the military's role in the United States US government's principal task of protecting its territory and citizens. Homeland Defense includes supporting domestic authorities for crisis and consequence management with regard to weapons of mass destruction WMD protecting national security assets such as installations and deploying forces and ensuring the availability, integrity and adequacy of other critical assets deterring and defending against strategic attacks while maintaining freedom of action through antiterrorism and force protection.

operations With this in mind it is essential to address the five pillars of force protection combating terrorism physical security personal security law enforcement and operations security OPSEC Physical security is a central component of force protection and provides an integrated venue to express support for operations Physical security is a primary leader task and an inherent part of all operations to protect soldiers family members civilians and resources This illustrated manual is loaded with practical information Protective systems design approach Vehicle bombs Speed control Exterior attack protection Building elements Standoff weapons Ballistics Covert entry and insider compromise Surveillance and eavesdropping Protective barriers Security lighting Electronic security systems Access control Lock and key systems Security forces In transit security Inspections and surveys Threat and vulnerability assessment
