Teaching by Design in Elementary Mathematics, Grades 2▢3 Jennifer Stepanek,Melinda Leong,Linda Griffin,2010-11-19 This professional learning programme for Key Stage 2 mathematics teaching is grounded in the latest research on the characteristics of effective professional development The materials help teachers deepen their content knowledge for important mathematical concepts in their grade increase their understanding of how students learn these mathematical ideas use their knowledge to develop effective lessons and improve instruction enhance their collaboration skills The mathematical content of Teaching by Design in Mathematics matches content topics in number and operations identified for each grade by the NCTM Curriculum Focal Points The culminating activity of the programme is the co creation of a prototype lesson which is taught to students by team members the team then investigates the impact of the lesson on student learning The cycle of investigating planning teaching observing debriefing and revising a lesson together contributes to a climate of continuous professional learning   *Supporting Multilingual Learners' Academic Language Development* Luciana C. de Oliveira,2023-04-13 A practical and comprehensive resource Supporting Multilingual Learners Academic Language Development A Language Based Approach to Content Instruction introduces an accessible language based approach to teaching academic language to multilingual learners across the content areas Luciana C de Oliveira provides elementary school teachers with everything they need to know to successfully teach grade level content to multilingual learners Chapters are organized by subject addressing the specific language demands of teaching English language arts social studies mathematics and science Each chapter features examples of implementation in grades K 5 practical strategies and a wealth of tables figures and other resources The Language Based Approach to Content Instruction LACI in this book provides teachers with a ready to use framework of six scaffolding elements that serves as a guide to enable multilingual learners to meet the grade level standard of their peers without simplification Aligned with WIDA and CCSS standards this resource provides the tools and methods teachers need to support multilingual learners academic language development in the content area classroom   **Teaching Early Algebra through Example-Based Problem Solving** Meixia Ding,2021-04-07 Drawing on rich classroom observations of educators teaching in China and the U S this book details an innovative and effective approach to teaching algebra at the elementary level namely teaching through example based problem solving TEPS Recognizing young children s particular cognitive and developmental capabilities this book powerfully argues for the importance of infusing algebraic thinking into early grade mathematics teaching and illustrates how this has been achieved by teachers in U S and Chinese contexts Documenting best practice and students responses to example based instruction the text demonstrates that this TEPS approach which involves the use of worked examples representations and deep questions helps students learn and master fundamental mathematical ideas making it highly effective in developing algebraic readiness and mathematical understanding This text will benefit post graduate students researchers and academics

in the fields of mathematics STEM and elementary education as well as algebra research more broadly Those interested in teacher education classroom practice and developmental and cognitive psychology will also find this volume of interest
