Air Transport and Operations Richard Curran, Stefaan S. A. Ghijs, Wim Verhagen, 2010 Proceedings of the First International Air Transport This book presents the proceedings of the First International Air Transport and Operations Symposium ATOS 2010 held at the Delft University of Technology in The Netherlands. The focus of ATOS 2010 and these proceedings is on how air transport can evolve. *Fundamentals of Electric Aircraft* Pascal Thalin, Ravi Rajamani, Jean-Charles Mare, Sven Taubert, 2018-12-18 Fundamentals of Electric Aircraft was developed to explain what the electric aircraft stands for by offering an objective view of what can be expected from the giant strides in innovative architectures and technologies enabling aircraft electrification. Through tangible case studies a deep insight is provided into this paradigm shift cutting across various aircraft segments from General Aviation to Large Aircraft. Addressing design constraints and timelines foreseen to reach acceptable performance and maturity levels. Fundamentals of Electric Aircraft puts forward a general view of the progress made to date and what to expect in the years to come. Drawing from the expertise of four industry veterans Pascal Thalin editor, Ravi Rajamani, Jean Charles Mare and Sven Taubert contributors it addresses futuristic approaches but does not depart too far from the operational down to earth realities of everyday business. Fundamentals of Electric Aircraft also offers analyses on how performance enhancements and fuel burn savings may bring more value for money as long as new electric technologies deliver on their promises.
