frustration when contacting your Internet Service Provider as you can try things ahead of speaking to them instead of having to start from scratch This topic is technical by nature but I've tried to break it down so you don't need loads of technical experience to make at least some progress It is focused on Broadband and Fibre as these are what I had to deal with during my years of working in IT infrastructure but some of the principles could be applied to other forms of Internet such as cable At the end of this book I touch upon issues relating to Wi-Fi and also the idea of a Backup Internet Connection so you can keep working when your main Internet connection goes down Ultimately no one wants to waste time and energy dealing with Internet problems which is why I'm sharing my experience in this book get your copy today Easy Internet

Misuse by Jurors. The Debate Circling The Jury and the Internet James Michael Corbett, 2020-08-28 Academic Paper from the year 2012 in the subject Law Criminal process Criminology Law Enforcement grade 2 1 City University London The City Law School course LLM Criminal Litigation language English abstract The use of the internet has increased over the recent decade It is to be expected that many people who are summoned for jury service will have some type of experience in its usage and may attempt to make reference to it This leads to jury members searching for information about their case online Public confidence in the jury system is waning whilst miscarriages of justice as a result of misuse of the internet by jurors is increasing Recent case law has identified a variety of different types of jury impropriety and has confirmed the limitations imposed by the protection of the confidentiality of jury deliberations How can the misuse be stopped What can be defined as a misuse of the internet Do only conscious findings count or even findings by chance How do one deal with stumbling over information James Michael Corbett gives an analysis into the problem of internet misuse committed by jurors in a court of law From a practical point of view he considers how serious the problem of misuse of the internet by jurors is and discusses the arguments for and or against different approaches to overcoming the problem Abolishing the misuse is the only way to prevent victims of having to be put through the whole process a second time because the jury may be discharged along with a new jury being empanelled **How to Make the Internet a More Effective Learning Tool** Saskia

Giebl, 2023 The internet has revolutionized how we access information allowing us not only to find new knowledge but also to retrieve information that we may already have stored in our memory but does not readily come to mind As a consequence we are vulnerable to googling before even trying to retrieve such information e.g. Storm et al 2017 Sparrow et al 2011 thus bypassing the benefits of retrieval as a memory modifier Bjork 1975 that is making the recalled information more memorable in the future Googling before thinking can have metacognitive costs as well such as impairing judgments as to whether information will be recallable if needed in the future In addition even a failed attempt to retrieve yet to be learned

information can potentiate learning versus simply being presented with that information typically referred to as the pretesting effect e.g. Grimaldi Kornell Hays Little Bjork 2016 To investigate the potential benefits of pretesting with the internet I examined whether an attempt to guess the answer to a question or problem before using the internet to find the solution aka thinking before googling can make the subsequently googled information more memorable compared to simply googling the answer right away Additionally I wondered as to whether thinking about yet to be learned information can also strengthen the memory for relevant information learned prior to the Google search Chapter 2 3 Furthermore I explored ways to enhance the attractiveness of engaging thinking before googling attempts without reducing its efficacy Chapter 4 Overall attempting to think before consulting the internet about a question or a solution to a problem promotes better memory for searched for information found on the internet as well as relevant information learned prior to the Google search Furthermore the findings indicate that the idea of hint support may result in a higher self reported willingness to engage in thinking before googling attempts without compromising the benefits of pretesting in the context of internet based learning Taken together these findings have implications for how one could use the internet as a more effective tool for learning
