*Understanding Assessment* David Lambert,David Lines,2013-04-15 This is the first title in this new series which is aimed principally at secondary PGCE and BAEd students and school and HEI based tutors Each book provides a digest of the central issues around a particular topic or issues grounded in or supported by examples of good practice with suggestions for further reading study and investigation The books are not intended as how to books but rather as books which will help students and teachers to explore and understand critical theoretical issues in ways that are challenging that invite critical reappraisals of taken for granted practices and perceptions and that provide appropriate links between theory and practice Issues related to equal opportunities and special needs are included in each separate volume There are boxes of questions think abouts further reading and bulleted summary lists for the reader This book is written specifically for teachers in training which will clarify the big picture of monitoring and assessment and makes the crucial distinctions in this large and still taken for granted field The authors have written widely on assessment matters and have also worked in various capacities for the QCA and its former manifestations They are also engaged in initial teacher education and so know the level and market extremely well **Tests** Qualifications and Curriculum Authority (Great Britain),Great Britain. Department for Education and Employment,Great Britain. Department for Education and Skills,2007 **Training to Teach in Primary Schools** Jane Medwell,2015-03-19 Full of practical help and guidance this is a must have for primary trainees on school experience whether they are in a school based or university based teacher training programme It begins by helping trainees to plan their own journey through training and beyond Taking control of their own training in this way supports student teachers to approach the course with confidence and secure their first teaching job The book provides guidance on adapting to working in school observing planning and evaluating in school teaching on placement assessing monitoring and reporting on children s progress self evaluation and how to pre empt and resolve issues securing the first teaching job and succeeding in the NQT year For student teachers the experience of school based training is exciting but also challenging this book supports them throughout and prepares them for the journey ahead Student feedback on this book Having been on a variety of teaching placements myself I know just how daunting and overwhelming experiences in school can be at times even with a supportive mentor by your side Hence I felt that this book can smooth out and rectify those worries one may face during a school placement and offers the reader a realistic insight into school experiences In my opinion the most useful chapter by far is the Moving On chapter near the end of the book This explains how to conclude a school placement what to expect from an interview and even how to set out a CV for a teaching position This was not something I expected to find in this book however it was very much welcomed and is in fact a very important valuable part of the book This is the type of book you can buy on your very first day of teacher training and use well into your days as a newly qualified teacher Jasmin Primary
