Fisher Body Division, The Industrial Craftworker Peter Cook,1996 This is a study of industrial craftworkers and their skills and also a study of two important linked sets of relationships between craftworkers and other industrial workers and between craftworkers and managers Because of their skill and all its implications craftworkers are both collaborators and antagonists within each relationship They are an important dynamic force in technological and organizational development in industry owing to their apparently contradictory positions and behaviour in relation to managers and other workers At the heart of this book are two historically based case studies of automobile factory workers in the United States and Britain providing new insights into craftworkers behaviour and relationships with other workers and with managers and their workplace strategies The possession and exercise of skill creates its own world view a great part of which is a belief that such work has its own moral value which in turn has industrial economic social and political consequences Conceptually craft skill may be viewed as an autonomous fount of power and consciousness More practically craft skill and craft control interact with other often hostile forces The dominating theme therefore is that craft skill and its corollary of craft control is crucial to an understanding of much industrial change and of many aspects of working class development **Adult Catalog: Authors** Los Angeles County Public Library,1970 *Moodys Manual of Railroads and Corporation Securities.
