

ACCESSORIES

Anti-Spin Differential

The Anti-Spin differential (optional at extra cost) provides additional traction on snow, ice, mud, sand and gravel, particularly when one drive wheel is on a surface providing poor traction. During normal driving and cornering, the Anti-Spin unit functions as a standard differential. When one wheel encounters a slippery surface, however, the Anti-Spin differential directs the driving force to the wheel having the better traction.

CAUTION: On cars equipped with an Anti-Spin differential, never run the engine for any reason with one drive wheel off the ground, since the car may drive through the wheel remaining on the ground.

Electric Clock

The electric clock (optional equipment) is automatically regulated to compensate for lost or gained time whenever the clock is reset. If the clock is running fast, set the hands back (counterclockwise); if running slow, set hands forward (clockwise). Several resettings, several days apart, may be needed to properly adjust the clock mechanism for any major correction.

Courtesy and Dome Lights

The dome light is controlled by the headlight switch. Turning this switch fully counterclockwise will turn the light on.

The courtesy lights (optional on some models) are controlled by the map light switch. These lights will come on automatically when the front doors are opened.

Cruise Control

Oldsmobile Cruise Control system (optional accessory) allows you to maintain the cruising speed you select on turnpikes or open highways without holding your foot on the accelerator pedal. The "ON-OFF" switch is located on the instrument panel to the left of the steering column. The engagement button is located in the end of the turn signal lever. To operate, push
