Atmospheric Science at NASA Erik M. Conway, 2008-12-08 Honorable Mention 2008 ASLI Choice Awards Atmospheric Science Librarians International This book offers an informed and revealing account of NASA's involvement in the scientific understanding of the Earth's atmosphere Since the nineteenth century scientists have attempted to understand the complex processes of the Earth's atmosphere and the weather created within it This effort has evolved with the development of new technologies from the first instrument equipped weather balloons to multibillion dollar meteorological satellite and planetary science programs Erik M Conway chronicles the history of atmospheric science at NASA tracing the story from its beginnings in 1958 the International Geophysical Year through to the present focusing on NASA's programs and research in meteorology stratospheric ozone depletion and planetary climates and global warming But the story is not only a scientific one NASA's researchers operated within an often politically contentious environment Although environmental issues garnered strong public and political support in the 1970s the following decades saw increased opposition to environmentalism as a threat to free market capitalism *Atmospheric Science at NASA* critically examines this politically controversial science dissecting the often convoluted roles motives and relationships of the various institutional actors involved among them NASA congressional appropriation committees government weather and climate bureaus and the military

Environmental Problems of Central Asia and their Economic, Social and Security Impacts Jiaguo Qi, Kyle T. Evered, 2008-10-11 Over the last 60 years we have recognized increasingly that our world is connected and the impacts of environmental catastrophes and economic crises in one region of our world have far reaching and long lasting consequences globally Central Asia is a developing region with great potential but there are valid concerns that current resource management practices are not sustainable particularly with regard to the management of water resources Recent changes in social structures accompanied by regional climate change have caused substantial environmental changes leading to security concerns in the region As a result the local economy has been significantly impacted to the extent that the potential for social unrest is of great concern This book explores new technologies and adaptation strategies to mitigate these environmental problems and cope with continued environmental change with the ultimate goal of promoting sustainable growth and improved quality of life in the region
