

# AMA Citation Format For Websites

## 10th Edition

### In-text Citation

Citing websites AMA, when in-text, does not use classic quoting where author's last name follows publication year.

Authors Last Name<sup>1</sup>

each source has only one number assigned to it, no matter how often or in which order it is cited

Jones<sup>1</sup> mentioned in a recent research that...

For sources without page number remember that page numbers always follow after citation personal number!

### In Bibliography

Reference page involves all sources in such order as listed or used by Arabic superscript. It means that sources are not listed alphabetically.

It should be noted that all journal titles that are cited in AMA should be abbreviated according to rules of the US National Library of Medicine's Current Fact Sheet.

Author or organization's name. Title of source material. Specify Website's Name, URL,  
Published date, Accessed date.

If publication's date is unknown, latest website update and access date are used instead.

## Ama Citation Generator:

**Mathematical modeling in energy homeostasis, appetite control and food intake with a special attention to ghrelin** Jorge Guerra Pires, 2017-03-18 The elegant interconnected mechanisms by which the gastrointestinal GI tract regulates food intake are a marvel of biology but the redundancy e g several hormones seem to have effects in food intake of both GI by means of hormones and central nervous system CNS by means of satiety satiation signals pathways governing energy homeostasis poses formidable challenges for scientists trying to take a clear glimpse of this machinery e g for designing anti obesity and alike pharmaceuticals In essence notwithstanding the astonishing advancements made over the past few decades in unscrambling many of the molecular pathways involved in energy homeostasis regulation a rather cloudy understanding of how all the pieces fit together to function as an integrated system is what can be found for the most part in the scientific community we discuss that in part II of the work in a single chapter divided in several sections for numerous imperative hormones e g cholecystokinin The current work is divided into three parts part I is regarding fundamentals of physiology and mathematical modeling employed all over the work part II is more generic and concerns several hormones what we have called a web of hormones and part III divided into three chapters is more specific concerning a single hormone i e ghrelin The core of the work is part III and to a certain extent part II bearing mind we provide a literature review based on papers scattered dispersed all over the medical science literature The main objective of this work is proposing a mathematical model for ghrelin dynamics Figure 70 a model centered on the gastrointestinal tract stomach small intestine a two compartment model with daily like dynamics short term dynamics and simultaneously proposing a prototype for a systems biology like model igure 40 a model based on numerous hormones for understanding mathematically food intake bodyweight control Ghrelin is a quite powerful orexigenic hormone discovered in the late 1990s that controls appetite and energy homeostasis alongside leptin and other hormones still to be investigated in depth by the medical sciences literature Accordingly we provide a simple mathematical model consisting of a set of ordinary differential equations detailing ghrelin dynamics combined to gastrointestinal signals due to meals Numerical simulations are able to replicate in silico available data from the literature additionally we were able to fit a reduced version of the basal model to experimental data The model is developed as a module for a bigger potential multi compartmental structure detailing food and energy homeostasis within a sort of a web of hormones see part II and the last chapter of part III The present contribute is to recommend a primary mathematical model for ghrelin dynamics centered in the gastrointestinal tract with potentiality to be applied also for postabsorptive states left mainly as future works We go on with the model by presenting mainly two variations further unfolding is left as future endeavor tastants and stochastic version We test several optimization routines for the parameter estimation procedure hybrid algorithms global local search for parameter estimation based on data published for humans three meals a day For all the routines the best is a hybrid composed of simulating annealing as global search and pattern

search as local search In the objective function sum of the squared errors SSE we apply artificial neural networks a two layer feedforward neural network for generating new data from the data already published a strategy adopted to increase the data set In the last part of the chapter about ghrelin modeling part III we propose several prototypes for future works based on the basal models the model used for parameter estimation is a minimal reduced model we also provide discussions and future works for the minimal model and parameter estimation Key words Ghrelin leptin mathematical modelling food intake appetite parameter estimation

### **Human-Computer Interaction and Technology Integration in Modern Society**

Rahman, Hakikur,2021-02-19 Technology has opened a wide window of novel communication methods and techniques and has become ubiquitous in modern society With advancements occurring rapidly and transforming practices and efficiencies within all fields including business education medicine engineering and so on it is important to remain up to date on the latest research findings Human Computer Interaction and Technology Integration in Modern Society is a critical reference source that examines the integration of technological innovations into every aspect of modern society including education and business Highlighting important topics that include digitization human development knowledge management and open innovation this book is ideal for IT specialists policymakers professionals academicians researchers practitioners and students

*Citation Management Tools* Nancy R. Glassman,2018-11-23 With the rise of scholarly communication proper citation and attribution practices have become more important than ever Citation management software is an essential tool for meeting this challenge Look no further than the proliferation of free and fee based packages on the market new programs and updated versions of existing software offering innovative features seem to pop up all the time Busy students and researchers do not have the time or energy to test drive all the available options in order to make an informed decision regarding the selection of the right tool to manage their references After finding the right tool they need someone to help them use it properly Librarians must be able to help their patrons navigate the many alternatives and effectively use the special features of the software they ultimately select Citation Management Tools A Practical Guide for Librarians was written to help librarians teachers and writers demystify the complex world of citation management software Topics include An overview of citation management software including what it can and cannot doAdvice on selecting the right program for the right researcher and the right projectA comparison of citation managers on the marketLeveraging citation managers to provide library servicesCitation management as a collaboration and networking toolWays to use citation managers to facilitate proper citation practices and avoiding plagiarismCitation managers to tame the unruly folders on your desktopMobile citation managementFuture trends This book focuses on the four citation managers commonly used in libraries EndNote Mendeley RefWorks and Zotero but other noteworthy tools are also described Citation Management Tools A Practical Guide for Librarians provides librarians with the essential skills and information required to support the use of citation managers at their libraries and explore creative ways to use these tools
