Apollo Al Cimino, 2019-05-14 Apollo follows man's dream of walking among the stars and charts how space travel and space programs have grown since then In 2019 it will have been 50 years since Neil Armstrong became the first man to walk on the Moon When his famous words came crackling across the atmosphere That's one small step for man one giant leap for mankind The first moon landing took place on July 20 1969 during the Apollo 11 mission Nine days earlier on July 11 1969 David Bowie released his iconic Space Oddity song about Major Tom the astronaut The two events resonated with people back on Earth like a match made in the heavens The crew of Apollo 11 Neil Armstrong Buzz Aldrin and Michael Collins had been launched into space by the powerful Saturn 5 a three stage rocket which was about as tall as a 36 story building It was the culmination of NASA's human spaceflight program which began 1961 This is the story of the Apollo Missions with all of its ups and downs in 1967 a cabin fire killed the entire crew of Apollo 1 and after an oxygen tank exploded the Apollo 13 crew limped back to Earth using the lunar module as lifeboat But despite Apollo's many setbacks twelve men walked on the Moon and their place in American history was assured forever *Congressional Record* United States. Security and National Power Stephen D. Bryen, 2017-07-05 In *Technology Security and National Power* Stephen D Bryen shows how the United States has squandered its technological leadership through unwise policies Starting from biblical times he shows how technology has either increased national power or led to military and political catastrophe He goes on to show how the US has eroded its technological advantages endangering its own security The scope of *Technology Security and National Power* extends across 3 000 years of history from an induced plague in Athens to chemical weapons at Ypres to an atomic bomb on Hiroshima to the nuclear balance of terror It describes new weapons systems and stealth jets cyber attacks on national infrastructure the looting of America's Defense secrets and much more The core thesis is supported by unique insight and new documentation that reaches into today's conflicted world More than a litany of recent failures and historical errors this book is a wake up call for political actors and government officials who seem unable to understand the threat *Technology Security and National Power* proposes that the United States can again become a winner in today's globalized environment **Knowledge...** Edwin Sharpe Grew, Baden Fletcher Smyth Baden-Powell, Arthur Cowper Ranyard, Wilfred
