

Mark scheme notes

Underlying principle

The mark scheme will clearly indicate the concept that is being rewarded, backed up by examples. It is not a set of model answers.

1. Mark scheme format

1.1 You will not see 'wtte' (words to that effect). Alternative correct wording should be credited in every answer unless the MS has specified specific words that must be present. Such words will be indicated by underlining e.g. 'resonance'

1.2 Bold lower case will be used for emphasis e.g. **'and'** when two pieces of information are needed for 1 mark.

1.3 Round brackets () indicate words that are not essential e.g. "(hence) distance is increased".

1.4 Square brackets [] indicate advice to examiners or examples e.g. [Do not accept gravity] [ecf].

2. Unit error penalties

2.1 A separate mark is not usually given for a unit but a missing or incorrect unit will normally mean that the final calculation mark will not be awarded.

2.2 This does not apply in 'show that' questions or in any other question where the units to be used have been given, for example in a spreadsheet

2.11. The map is well-defined with respect to the given coloring or monochrome with only some additional conditions apply to apply.

12. The two significant figures will mean that the final result cannot be reported as more than two significant figures, even if more significant figures than this are in the quantities involved in the calculation. Demonstrate this using the following example:

NOTE: The use of non-significant figures might be inappropriate in the context of this question e.g. reading a value off a graph. If this is the case, there will be a clear indication in the text.
