Classroom-based Research and Evidence-based Practice Keith Taber, 2007-06-15 This work is designed to support teachers in developing their skills in critically evaluating research reports and in planning and carrying out their own small scale school or college based research

Challenging the Qualitative-Quantitative Divide Barry Cooper, Judith Glaesser, Roger Gomm, Martyn Hammersley, 2012-03-08 This book challenges the divide between qualitative and quantitative approaches that is now institutionalized within social science Rather than suggesting the mixing of methods Challenging the Qualitative Quantitative Divide provides a thorough interrogation of the arguments and practices characteristic of both sides of the divide focusing on how well they address the common problems that all social research faces particularly as regards causal analysis The authors identify some fundamental weaknesses in both quantitative and qualitative approaches and explore whether case focused analysis for instance in the form of Qualitative Comparative Analysis Analytic Induction Grounded Theorising or Cluster Analysis can bridge the gap between the two sides

Raising Achievement in Secondary Mathematics Anne Watson, 2006-06 This book argues for changed attitudes towards low attaining students in secondary mathematics Certain social groups regularly underachieve in mathematics so attainment is seen as an issue of social justice The way that assessment testing teaching and grouping decisions in mathematics can confirm a cycle of low attainment is carefully described with well founded arguments based on many years experience and research Anne Watson offers an alternative view of attainment and capability based on real classroom incidents in which low attaining students show themselves to be able to think about mathematics in quite sophisticated ways She argues that teaching could be based on learners proficiency rather than seen as correcting or confirming deficits in knowledge and behaviour She describes how a group of teachers who

believed that their students could do better with higher expectations developed a range of principles and strategies which supported their work the students showed significant progress and the teachers felt they were doing a better job This book is for anyone who is in a position to challenge existing practice in mathematics teaching either in their own classroom or in the broader cultures of teaching It offers the arguments the knowledge and the support for changing practice in a non

judgemental practical but well founded way **New KS1 Maths SATS Practice Papers: Pack 1 (for the Tests in 2019)**

Science...Again? Martin Braund,2008-10-09 The structure of this book encourages active participation via reflective activity boxes which further allows for the engagement and consolidation of ideas Evidence based research is cited resulting in the author suggesting a number of practical activities to encourage progression and continuity in science ESCalate Why do pupils learning and motivation slow down markedly as they move from primary to secondary school Why is this situation worse in science than in any other curriculum subject This book combines reports of and reflection on best practice in improving progression and continuity of teaching and learning in science particularly at that transition stage between primary and secondary school Presenting the views of teachers and pupils on progression learning and application of science the book suggests practical ways of improving teaching and learning in science Each chapter includes examples of learning materials with notes on how these might be used or adapted by teachers in their own classroom settings Science teaching in secondary schools is often based on assumptions that children know or can do very little so the job in the secondary school becomes one of showing pupils how to start doing science properly as if from scratch The damage that this false view can do to pupils learning motivation and confidence is clear This book will help teachers to assess children s prior knowledge effectively and build meaningful and enjoyable science lessons **Mastery in Reading Comprehension** Kala
