2015 Prospector Of Western Cape:

Rethinking Forest Concessions Food and Agriculture Organization of the United Nations, 2018-05-10 This report forms part of a review aimed at providing advice on improving forest concession systems in tropical forests. The review was carried out by FAO in cooperation with the International Tropical Timber Organization, the Brazilian Forest Service, the Center for International Forestry Research and Centre de Coopération Internationale en Recherche Agronomique pour le Développement. The report is based on three regional reports produced by consultants discussions at an expert meeting in Rome in November 2015 and a literature review

Toxicology in Antiquity, 2018-10-22 Toxicology in Antiquity provides an authoritative and fascinating exploration into the use of toxins and poisons in antiquity. It brings together the two previously published shorter volumes on the topic as well as adding considerable new information. Part of the History of Toxicology and Environmental Health series, it covers key accomplishments, scientists and events in the broad field of toxicology including environmental health and chemical safety. This first volume sets the tone for the series and starts at the very beginning historically speaking with a look at toxicology in ancient times. The book explains that before scientific research methods were developed, toxicology thrived as a very practical discipline. People living in ancient civilizations readily learned to distinguish safe substances from hazardous ones, how to avoid these hazardous substances and how to use them to inflict harm on enemies. It also describes scholars who compiled compendia of toxic agents. New chapters in this edition focus chiefly on evidence for the use of toxic agents derived from religious texts. Provides the historical background for understanding modern toxicology. Illustrates the ways previous civilizations learned to distinguish safe from hazardous substances, how to avoid the hazardous substances and how to use them against enemies. Explores the way famous historical figures used toxins. New chapters focus on evidence of the use of toxins derived from religious texts

Catalog Yale University. Yale Collection of Western Americana, 1962 Potassic Igneous Rocks and Associated Gold-Copper Mineralization Daniel Müller, David I. Groves, 2018-06-11 This book reviews the geochemical and petrological characteristics of potassic igneous rock complexes and investigates the various tectonic settings in which these rocks occur. The authors provide an overview and classification of these rocks and elucidate the geochemical differences between barren and mineralized potassic igneous complexes. High K rocks are genetically associated with a number of epithermal gold and porphyry copper gold deposits. In recent years there has also been growing recognition of an association of such rocks with iron oxide copper gold IOCG deposits, intrusion related gold deposits, IRGDs and Carlin type gold deposits. This fifth updated and expanded edition incorporates new data and references from world class copper and gold deposits worldwide. It also includes the latest publications on the petrogenesis of high K magmatism and related mineral deposits. Numerous new representative ore photographs of the mineral deposits described are also included in the new edition. As such the book offers a valuable guide not only for academic petrologists working on alkaline rocks but also for exploration geologists prospecting
