2015 Question Paper For Life Orientation:

Gender and Young People's Digital Sexual Cultures Deevia Bhana, 2025-08-13 This volume focuses on the role of gender in young people's digital sexual cultures in South Africa. Offering a snapshot of their lives as they navigate the online world, this book explores young people's heterosexual desires and the materialisation of gender inequalities. The chapters in the book take heed of human and more than human elements and understand the connection between devices, technologies, images, sexting, filters, pornography, sexuality and violence as affective flows with potential for new becomings and new constraints. Chapters also detail how these experiences are woven with global and local norms regarding heterosexuality, masculinity and femininity, shaping young people's web surfing experiences amid pleasure and peril. Chapter 1 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com **Systematic**

Approaches to Mental Health Care and Promotion Bach Tran, Roger C. Ho, Brian James Hall, 2020-06-05 Globally, mental health problems remain as one of the largest contributors to the population burden of diseases. According to WHO, common mental disorders including depression and anxiety affect the health of about 9% of the world's population and account for over 10% of the total years lived with disability. In many parts of the world, the number of people with mental health disorders has been increasing, fueled by a rapid population growth and aging, as well as urbanization and immigration. It is estimated that 80% of these non-fatal diseases occurred in low and middle income countries. However, in such settings, coverage of both preventive and curative services is still very limited. Diversity in socio-cultural backgrounds and limited capacity of local health care systems are emphasizing the importance of systematic approaches to understanding and intervening in the issue. Although the social, economic and health burden of mental health issues are substantial, effectiveness of policies and interventions is varied across regions and largely driven by contextual factors. Evidence-based prevention and treatment approaches involve the synthesis of epidemiological surveys, assessment of clinical populations (e.g. chronic medical diseases, chronic psychiatric illnesses) and studies exploring the role of biological markers in psychiatric illnesses. This Research Topic aims to introduce the latest research findings on the application of system thinking in Mental Health Care and Promotion.

Perspectives on Children's Spirituality in Diverse and Changing Contexts John Chi-Kin Lee, 2024-07-19 This book offers multidisciplinary and inclusive perspectives on children and young people's spirituality and its research in diverse socio-cultural contexts. It brings together a collection of select research articles that were published over a period of nearly two decades (2003-2021) in the International Journal of Children's Spirituality (IJCS) to celebrate the journal's 25th anniversary. Featuring contributions by leading international scholars from U.K., U.S., Canada, Finland, Australia, Hong Kong and China, this edited volume focuses on different and complementary perspectives on children's spirituality in diverse and changing contexts. Chapters cover topics such as the study of children's spirituality as a natural form of human awareness, a proposed pluricultural approach, the potential contributions of psychoanalytic tradition and cognitive psychology, possible influences of
