**Exploration and Production of Oceanic Natural Gas Hydrate** Michael D. Max, Arthur H. Johnson, 2016-08-16 This book describes aspects of the natural gas hydrate NGH system that offer opportunities for the innovative application of existing technology and development of new technology that could dramatically lower the cost of NGH exploration and production. It is written for energy industry professionals and those concerned with energy choices and efficiencies at a university graduate level. The NGH resource is compared with physical, environmental and commercial aspects of other gas resources. The authors' theme is that natural gas can provide for base and peak load energy demands during the transition to and possibly within a renewable energy future. To truly explore war and conflict one must consider why the peoples and the leaders of the world behave the way that they do toward one another. For instance, why are refugees in a variety of circumstances treated so inhumanely in times of conflict and unrest through no fault of their own? How are women and those in the LGBTQ community treated in terms of service to their country? *Examining War and Conflict around the World* includes ten chapters each addressing a specific issue relating to war and conflict as it pertains to a variety of countries including anti-Americanism, military robots and drones, nuclear weapons and proliferation, and torture. Each chapter begins with an introduction to the issue. Following the chapter introduction, each chapter highlights that issue in eight countries. Chapters provide historical perspective but the book addresses each of the issues in a contemporary context. This work will provide an overview for all readers of ten very important topics that address matters relating to war and conflict in the twenty-first century. *Human-Computer Interaction* Vanessa Agredo-Delgado, Pablo H.
