AI Schools Spring Break 2014:

The Politics of White Rights Joseph Bagley, 2018-12-15 In *The Politics of White Rights* Joseph Bagley recounts the history of school desegregation litigation in Alabama focusing on the malleability and durability of white resistance. He argues that the litigious battles of 1954-73 taught Alabama's segregationists how to fashion a more subtle defense of white privilege placing them in the vanguard of a new conservatism oriented toward the Sunbelt not the South. Scholars have recently begun uncovering the ways in which segregationists abandoned violent backlash and overt economic reprisal and learned how to rearticulate their resistance and blind others to their racial motivations. Bagley is most interested in a creedal commitment to maintaining law and order which lay at the heart of this transition. Before it was a buzz phrase meant to conjure up fears of urban black violence, law and order represented a politics that allowed self-styled white moderates to begrudgingly accept token desegregation and to begin to stake their own claims to constitutional rights without forcing them to repudiate segregation or white supremacy. Federal courts have as recently as 2014 agreed that Alabama's property tax system is crippling black education. Bagley argues that this is because in the late 1960s the politics of law and order became a politics of white rights which supported not only white flight to suburbs and private schools but also nominally color-blind changes in the state's tax code. These changes were designed to shield white money from the needs of increasingly black public education. Activists and courts have been powerless to do anything about them because twenty years of desperate litigious combat finally taught Alabama lawmakers how to erect constitutional bulwarks that could withstand a legal assault.

When Race Trumps Merit Heather Mac Donald,2023-04-18 Does your workplace have too few black people in top jobs It s racist Does the advanced math and science high school in your city have too many Asians It s racist Does your local museum employ too many white women It s racist too After the Black Lives Matter protests of 2020 prestigious American institutions from the medical profession to the fine arts pleaded guilty to systemic racism How else explain why blacks are overrepresented in prisons and underrepresented in C suites and faculty lounges their leaders asked The official answer for those disparities is disparate impact a once obscure legal theory that is now transforming our world Any traditional standard of behavior or achievement that impedes exact racial proportionality in any enterprise is now presumed racist Medical school admissions tests expectations of scientific accomplishment in the award of research grants the enforcement of the criminal law all are under assault because they have a disparate impact on underrepresented minorities When Race Trumps Merit provides an alternative explanation for those racial disparities It is large academic skills gaps that cause the lack of proportional representation in our most meritocratic organizations and large differences in criminal offending that account for the racially disproportionate prison population The need for such a corrective argument could not be more urgent Federal science agencies now treat researchers skin color as a scientific qualification Museums and orchestras choose which art and music to promote based on race Police officers avoid making arrests and prosecutors decline to bring charges to avoid disparate impact on minority criminals When Race Trumps Merit breaks powerful taboos But it is driven by a sense of alarm supported by detailed case studies of how disparate impact thinking is jeopardizing scientific progress destroying public order and poisoning the appreciation of art and culture As long as alleged racism remains the only allowable explanation for racial differences we will continue tearing down excellence and putting lives as well as civilizational achievement at risk
