*Responsible and Smart Land Management Interventions* Walter Timo de Vries, John Tiah Bugri, Fatima Mandhu, 2020-07-16. This book showcases new empirical findings on the conceptualization, design and evaluation of land management interventions and addresses two crucial aspects: how and under which conditions such interventions are responsible and how such interventions can be supported by smart technologies. Responsible and Smart Land Management Interventions is for all types of actors in land management. Although primarily based on cases from Africa, it addresses land management issues from practical and theoretical perspectives relevant for land managers worldwide. It brings the discourse up to date and helps all practitioners designing new policies and those looking for new instruments to do so. Aimed at land academics including students, teachers and researchers as well as practitioners including those working within international organizations, donor organizations, NGOs and land independent consultants, this book delivers innovative methodologies for land management for professionals involved in land administration projects. Explores land management from a geodetic and spatial planning perspective. Includes real cases, empirical data and analysis in contemporary and alternative land management developments in Africa. Addresses important land issues which contribute to national development and achieving United Nations SDGs. Discusses contemporary research findings related to societal needs in land administration which are equally valid for non-African contexts. Acts as a new teaching resource for land management and land administration courses and land related disciplines in geodesy, human geography, development studies and environmental planning.
