Borderless Africa Francis Mangeni, Andrew Mold, 2024-04-18 The African Continental Free Trade Area established in 2018 represented a monumental step forward for Africa in terms of meeting longstanding aspirations for greater economic and political integration But it has nonetheless been met with scepticism in some quarters both within the continent and beyond Borderless Africa makes the case for the AfCFTA in an accessible and compelling way without shying away from technical and academic debates Francis Mangeni and Andrew Mold take us on a journey through the different dimensions and implications of the AfCFTA the largest free trade zone in the world starting with its underlying economic rationale Pointing to the numerous historical examples of successful regional integration they argue that the African continent will need to take on board such lessons as the agreement is implemented They discuss too the more controversial elements of the AfCFTA including the freedom of movement protocol contending that this should not be seen as an optional extra but as an intrinsic part of the accord Also exploring the role of external partners in the construction of an economically stronger more united Africa this fascinating study reveals how the AfCFTA is contributing to sustainable development across the continent

Tipping Point for Advanced Capitalism D.W. Livingstone, 2023-09-07T00:00:00Z Tipping Point for Advanced Capitalism is a pathbreaking study of the changing class makeup of the Canadian other G7 and Nordic labour forces since the 1980s documenting especially the rise of non managerial professional employees The book provides unprecedented tracking of the links between employment classes and higher levels of class consciousness including the often hidden political consciousness of corporate capitalists as well as the extent of oppositional and revolutionary consciousness among non managerial workers The large differences exposed between class conscious capitalists and these non managerial workers on issues of poverty reduction and global warming reveal the strategic roles these key class agents play in actions to defend or transform advanced capitalism The most concerted evidence based study to bring class back into grasping the intimately linked ecological economic and political crises we now face

Towards a Sustainable Future United Nations Publications, 2016 This report aimed at policy makers from Asia and the Pacific provides a historical perspective on regional energy connectivity and its implementation challenges as well as outlining an action plan for accelerated regional energy integration to bring shared benefits to ESCAP's member States The report concludes that energy connectivity can increase the supply and reduce the cost of energy while lowering its social and environmental costs and addressing the challenges of energy security Regional cooperation in energy has been evolving mainly through five subregional clusters South East Asia Central Asia South Asia North East Asia and the Pacific A great many resources have been spent on bringing the subregions together however overall results remain below the potential One of the main reasons for the slow progress is the decision making process for cross border projects Energy markets do not connect by themselves in the next few decades actions will be needed to build physical energy networks institutional connectivity and most importantly trust between nations to meet the Region's two most important challenges overcoming energy poverty and mitigating climate change Governments

policymakers and experts must work together in partnership with the private sector to provide sustainable energy for all by 2050 by connecting Asian energy networks and building institutions of integration ESCAP is in a unique position to lead such a transformative partnership for ensuring that regional energy connectivity creates incentive structures and institutions to deliver cost effective energy for the entire Region It is time to build energy connectivity for an interdependent Asia and the Pacific prosperous and connected thus ending Asian economic dependence on a single source or a single fuel Rankings and the Reshaping of Higher Education Ellen Hazelkorn,2015-03-23 University rankings have gained popularity around the world and are now a significant factor shaping reputation This second edition updates Ellen Hazelkorn s first comprehensive study of rankings from a global perspective drawing in new original research and extensive analysis It is essential reading for policymakers managers and scholars *The Public Wealth of Cities* Dag Detter,Stefan Folster,2017-07-18 How to leverage existing resources to meet the current and future needs of cities Crumbling streets and bridges Poorly performing schools and inadequate social services These are common complaints in cities which too often struggle just to keep the lights on much less make the long term investments necessary for future generations It doesn t have to be this way This book by two internationally recognized experts in public finance describes a new way of restoring economic vitality and financial stability to cities using steps that already have been proven remarkably successful The key is unlocking social human and economic wealth that cities already own but is out of sight or hidden A focus on existing public wealth helps to shift attention and resources from short term spending to longer term investments that can vastly raise the quality of life for many generations of urban residents A crucial first step is to understand a city s balance sheet too few cities comprehend how valuable a working tool this can be With this in hand taxpayers politicians and investors can better recognize the long term consequences of political decisions and make choices that mobilize real returns rather than rely on more taxes debt or austerity Another hidden asset is real estate Even poor cities own large swathes of poorly utilized land or they control underperforming utilities and other commercial assets Most cities could more than double their investments with smarter use of these commercial assets Managing the city s assets smartly through the authors proposed Urban Wealth Funds at arm s length from short term political influence will enable cities to ramp up much needed infrastructure investments
