The Political Economy of Communications Kenneth Dyson,Peter Humphreys,2023-10-20 First published in 1990 The Political Economy of Communications explores the central theme of the relationship between politics and markets in policy development The contributors show how governments have been drawn into increasing interdependency by technological and market developments with international institutions like the European Community becoming more important in these policy areas They argue that neither government ideologies nor market and technological forces offer an adequate account of the processes of change in communications policy These conclusions lead to a critique of central theories of international political economy notably neo liberalism and the authors advocate instead a neo pluralist perspective for the study of political economy of communications an approach that takes institutions much more seriously as a central unit of analysis The book will be of interest to students of international relations European studies and media and telecommunication studies as well as to political scientists and economists concerned with public policy
