*Diagnosing Internet Connection Issues* Rob Pember, 2020-06-09 We rely so much on the Internet that when our connection goes down or behaves very slowly it is not only very frustrating but has an impact on our business and personal lives It s even worse if Internet connection problems are intermittent or on going Getting to the bottom of WHY the problems are happening can be a needle in a haystack but having some basic understanding and things to test can help to identify whether the problem is with something at your premises the Internet Service Provider or in the case of Broadband Fibre the underlying phone network This also saves time and frustration when contacting your Internet Service Provider as you can try things ahead of speaking to them instead of having to start from scratch This topic is technical by nature but I ve tried to break it down so you don t need loads of technical experience to make at least some progress It is focused on Broadband and Fibre as these are what I had to deal with during my years of working in IT infrastructure but some of the principles could be applied to other forms of Internet such as cable At the end of this book I touch upon issues relating to Wi Fi and also the idea of a Backup Internet Connection so you can keep working when you main Internet connection goes down Ultimately no one wants to waste time and energy dealing with Internet problems which is why I m sharing my experience in this book get your copy today
