González, Farook Hamzeh, Luis Fernando Alarcón, 2022-12-30 This book introduces and develops the novel concept of Lean Construction 4.0 The capability of Lean Construction to effectively adapt the architecture engineering construction AEC industry to this new era of digital transformation requires a reconceptualization of the triad people processes technology as a foundation for the theoretical and practical framework of Lean Construction Therefore a shift towards Lean Construction 4.0 is required Lean Construction 4.0 is a new systems wide thinking approach where synergies and overlaps between Lean Construction and digital smart technologies go far beyond BIM to reshape the way we design manage and operate capital projects in the modern age of automation This pioneering new book brings together the views of world experts at the interface of Lean Construction and digital smart technologies in order to channel research efforts to introduce and discuss current research and practice challenges and drivers and future perspectives of Lean Construction 4.0 It is not the aim of the book to keep adding digits to the term Lean Construction to catch up with the industry revolutions as they go on Instead after reading this book it will be undeniable for readers that the triad process people technology as proposed by Lean Construction 4.0 is required to achieve an effective long lasting digital transformation of the AEC industry Thus the aim of Lean Construction 4.0 is better explained by what it evokes a future vision of construction systems comprising people processes and technology using Industry 4.0 5.0 as a basis for technological innovation in the AEC industry coupled with Lean Construction theory and practice as a jettison for improved processes and systems integration The Lean Construction 4.0 concept coined and developed in this edited book is unique and the chapters provide practitioners and academics with a provocative reflection on the theoretical and practical aspects that shape the Lean Construction 4.0 concept More importantly Lean Construction 4.0 proposes a rationale for the AEC industry not only to survive but to thrive **English Mechanic and World of Science** ,1871 **Historiography** Susan K.
