Credit Rating Governance Ahmed Naciri, 2015-01-30 Credit rating agencies play an essential role in the modern financial system and are relied on by creditors and investors on the market. In the recent financial crisis their power and reliability were often questioned yet a simple rating downgrade could threaten to bankrupt a whole country. This book examines the governance of credit rating agencies as expressed by their ability to fairly ethically and consistently assign higher rates to issuers having lesser default risks. However factors such as the drive for increased revenue and market share the inadequate business model the inadequate methodology of assessing risk opacity and inadequate internal monitoring have all been identified as critical governance failures for credit agencies. This book explores these issues and proposes some potential solutions and improvements. This will be of interest to researchers and advanced students of corporate finance finance financial economics risk management investment management and banking.

Research Handbook on State Aid in the Banking Sector François-Charles Lapr v te, Joanna Gray, Francesco de Cecco, 2017-11-24 The Research Handbook on State Aid in the Banking Sector brings together experts in state aid and in financial regulation drawn from legal academia legal practice economics and from the EU and EEA institutions to shed light on this relationship. The editors and expert contributors do this by elucidating key concepts that underpin the application of state aid law to banks and by considering specific aspects of the interface between state aid and financial regulation. The Handbook's analysis is complemented by a number of key country based case studies and by a concluding section which takes stock of the Banking Union's package of legislative regulatory reforms and reflects on the possible future role of state aid in this sector.

Towards a molecular classification of colorectal cancer Alessandro Lugli, 2015-06-03 In 2007 Jeremy Jass proposed a molecular classification of colorectal cancer including KRAS BRAF Mismatch Repair CIMP and MGMT Status. Since then many prognostic and predictive studies have been published on this topic mainly focusing on one single molecular marker. The aim of the e book is to summarize the knowledge in 2014 from a multidisciplinary point of view that can potentially be used as a manual by CRC researchers in every field.
