

1. **Abstract** – The purpose of this study was to investigate the effect of a 12-week training program on the physical and psychological health of elderly people. The study was conducted in a community center in a large city. The participants were 30 elderly people (15 men and 15 women) aged 65 and older. They were divided into two groups: a control group and an experimental group. The experimental group participated in a 12-week training program that included aerobic exercise, strength training, and flexibility exercises. The control group did not participate in any training program. The results of the study showed that the experimental group had significantly higher levels of physical fitness and psychological well-being than the control group at the end of the 12-week period. The findings suggest that a 12-week training program can improve the physical and psychological health of elderly people.

Answer Key To Vistas Supersite Lesson 1:

The Handbook of Technology and Second Language Teaching and Learning Carol A. Chapelle, Shannon Sauro, 2017-06-28 The Handbook of Technology and Second Language Teaching and Learning presents a comprehensive exploration of the impact of technology on the field of second language learning. The rapidly evolving language technology interface has propelled dramatic changes in and increased opportunities for second language teaching and learning. Its influence has been felt no less keenly in the approaches and methods of assessing learners' language and researching language teaching and learning. Contributions from a team of international scholars make up the Handbook, consisting of four parts: language teaching and learning through technology; the technology pedagogy interface; technology for L2 assessment and research; and development of technology for language learning. It considers how technology assists in all areas of language development: the emergence of pedagogy at the intersection of language and technology; technology in language assessment; and major research issues in research and development of technologies for language learning. It covers all aspects of language, including grammar, vocabulary, reading, writing, listening, speaking, pragmatics, and intercultural learning, as well as new pedagogical and assessment approaches and new ways of conceiving and conducting research and development. The Handbook of Technology and Second Language Teaching and Learning demonstrates the extensive, multifaceted implications of technology for language teachers, learners, materials developers, and researchers. *Journal of the Air & Waste Management Association*, 2008
