The Descent of Man: DNA coding gives the answer Victor W. Chang, Guoping Song,2020-07-04 There are two big problems that science still has not resolved They are What are we Where do we come from These two questions have troubled people for centuries 150 years ago Charles Darwin wrote two books On the Origin of Species and The Descent of Man and Selection in Relation to Sex In these two books the theory of species evolution was proposed all species are constantly evolving the present people and all species are formed through natural selection The basis of this theory is based on the comparison of biological forms Now knowing that all the genetic information of living things is completely determined with DNA is evolution still correct Did humanity evolve from apes This book will answer these questions

Original Selfishness Daryl P.

Domning,Monika K. Hellwig,2016-12-05 This book defends a startling idea that the age old theological and philosophical

problems of original sin and evil long thought intractable have already been solved The solution has come from the very

scientific discovery that many consider the most mortal threat to traditional religion evolution Daryl P Domning explains in straightforward terms the workings of modern evolutionary theory Darwinian natural selection and how this has brought forth life and the human mind He counters objections to Darwinism that are raised by some believers and emphasizes that the evolutionary process necessarily enforces selfish behavior on all living things This account of both physical and moral evil is arguably more consistent with traditional Christian teachings than are the explanations given by most contemporary evolutionary theologians themselves The prominent theologian Monika K Hellwig dialogues with Daryl Domning throughout the book to present a balanced reappraisal of the doctrine of original sin from both a scientist s and theologian s perspective
