refers to its involvement at a strategic level within the retail company where it can influence the conditions of retail internationalisation. When logistics is involved more proactively its operations can become better aligned with the other company operations involved in retail internationalisation. Furthermore proactive logistics support enables more efficient and effective logistics that can better cope with increased complexity as well as more effectively keeping track of logistics costs. In addition to these findings the importance of top management has been identified as a key aspect of proactive logistics support. More specifically logistics competence within the top management team enables logistics to be prioritised at a strategic level and to be better integrated during retail internationalisation including during individual establishments into new markets. The findings also suggest that the importance of logistics increases over time during retail internationalisation. The more markets the retailer enters the more important efficient logistics becomes in order to deal with both complexity and logistics costs. By involving proactive logistics from the start of retail internationalisation retail chains can more efficiently and effectively establish into and operate within foreign sales markets which in turn supports a sustainable retail internationalisation. One of the main academic contributions of this licentiate thesis has been to study logistics in the specific context of retail internationalisation which has previously not been researched in any great detail. In addition logistics has often been studied as a static aspect but in this thesis it is studied from a dynamic perspective in order to understand how its supporting role changes over time during the early stage of retail internationalisation. Another important contribution is that the role of logistics has been studied from both a strategic and an operational level as previous research has mostly focused on the strategic level of logistics related to retail internationalisation. In terms of practical contributions this licentiate thesis clarifies the logistics characteristics and supply chain capabilities that support the early stage of retail internationalisation. This licentiate thesis can also help practitioners to better prepare their logistics organisation and logistics operations for a future retail internationalisation as well as helping them to avoid making logistical mistakes during the early stage of retail internationalisation. *Accounts and Papers of the House of Commons* Great Britain.
