Wallace,Peter Staats,2004-03-05 A quick reference to the management of pain for specialists as well as general medical practitioners and residents Written in a concise bulleted format the content is limited to only the essential facts necessary for assessment and treatment of common pain conditions and presentations A perfect review tool for both the anesthesia and pain medicine board exams   **Accountability in Social Research** Norma Romm,2007-05-08 In this book I have concentrated on drawing attention to various conceptions of accountability that might be brought to bear in judging the practice of social research Much of the book is organized around making explicit the assumptions that influence what counts as proper research in society including assumptions about how social inquirers might be held accountable My focus is on reviewing discourses around the practice of professional inquiry with a view to reconsidering the way in which people create expectations for accountable social inquiry My focus hereon is related to my concern that the manner in which judgments about researchers accountability are made is not without social consequences for our way of living in society I have approached the issues by beginning with a discussion of tenets of the position called positivism so named by certain proponents and by considering the view on accountability that is implied by adherence to these tenets Briefly expressed positivist argumentation suggests that researchers are required to do science in a manner that warrants their being considered indeed scientists I use my discussion of accountability as seen within positivist argumentation to explicate ways in which alternative positions have arisen as ways of treating accountability issues Through my way of comparing the various positions I hope to provide some indication of the complexity of ethical and accountability issues in social inquiry
