

## Inconvenient Truth

### Discussion Questions

#### Background

1. A quote often attributed to Mark Twain states,

*"What gets us into trouble is not what we don't know. It's what we know for sure that just ain't so."*

How does this relate to Pangaea and the Theory of Plate Tectonics?

The idea that the continents fit together was rejected by many for along time, as the notion of entire land masses moving was simply too unbelievable. This, of course, turned out to be true.

2. The sun emits three main wavelengths of energy that reach the earth. Which is responsible for global warming?

- a. Infrared
- b. Ultraviolet
- c. Visible

3. A clip from the Futurama episode *Crimes of the Hot* is shown. At the end of the clip, global warming is "solved" by dropping larger and larger ice cubes into the ocean.

- a. How is this a metaphor for how global warming has been handled in the real world?  
The problem isn't really being dealt with or given any urgency. We may be forced to come up with a last-minute solution.

- b. Assume that humanity had the technology to mine and transport large amounts of ice from other planets to the Earth. Why would this solution not actually work?

Among other problems, as the ice in the ocean melted, it would cause sea levels to rise, creating a massive amount of flooding in coastal areas.

**Data Talk** David E. Nelson (M.D.), Bradford W. Hesse, Robert T. Croyle, 2009 The demand for health information continues to increase but the ability of health professionals to provide it clearly remains variable The aim of this book is 1 to summarize and synthesize research on the selection and presentation of data pertinent to public health and 2 to provide practical suggestions based on this research summary and synthesis on how scientists and other public health practitioners can better communicate data to the public policy makers and the press in typical real world situations Because communication is complex and no one approach works for all audiences the authors emphasize how to communicate data better and in some instances contrast this with how to communicate data worse rather than attempting a cookbook approach The book contains a wealth of case studies and other examples to illustrate major points and actual situations whenever possible Key principles and recommendations are summarized at the end of each chapter This book will stimulate interest among public health practitioners scholars and students to more seriously consider ways they can understand and improve communication about data and other types of scientific information with the public policy makers and the press Improved data communication will increase the chances that evidence based scientific findings can play a greater role in improving the public s health

**Global Climate Change** David Kitchen, 2023-09-29 Earth s climate is changing This book investigates the scientific environmental social political and economic aspects of climate change It enables students to reach an informed opinion and encourages active engagement in finding solutions It begins with a strong introduction to the scientific factors that drive natural and anthropogenic climate change and expands over three chapters to explore the impact of greenhouse gases on the

distribution of solar energy across land sea ice and air The author examines geologically ancient climates in order to highlight possible future scenarios and case studies from around the world highlight the impact of climate change on the physical and human environment The final chapters investigate how society can respond to the challenges of climate change and overcome the political social and economic factors that are barriers to progress focusing on the role of energy policy fiscal policy and risk assessment as a means to stimulate discussion about science society and the role of the media Science is the foundation of any solution but to turn this knowledge into action requires the application of a broad set of skills that are rooted in the liberal arts experience such as critical thinking analytical thinking problem solving and communication This textbook will be an essential resource for students taking courses in environmental geography climate change natural hazards climatology and meteorology

**Climate Change as Social Drama** Philip Smith,Nicolas Howe,2015-05-05 Climate Change as Social Drama looks at the cultural sociology of climate change in public communication

**From Martyrs to Murderers** Robert L. Dahlgren,2017-04-13 In From Martyrs to Murderers the author explores the connections between the dark unflattering representations of public schools teachers and teaching in popular Hollywood films and the conservative attacks on public education that have culminated in a generation of neo liberal standards reform measures The author s analysis is based on a survey of 60 movies that feature significant interactions between public school teachers and their students This study employed a textual analysis method involving viewing the films alongside original script material which reveals that the narratives involving public schools during the late 20th century and early 21st century are distinct from those involving other types of schools or eras Rather than the romantic figures of earlier portraits such as Eve Arden s beloved Our Miss Brooks in the 1940s and 1950s radio and television serial these teachers are consistently portrayed as negative archetypes thus providing a rationale for the school reform agenda of the 1980s The sheer repetition of these damaging images in Hollywood products of the period made the American public more susceptible to the deceptive arguments outlined in A Nation at Risk the seminal 1983 report that provided the blueprint for the standards reform movement that has dominated education policy for the past generation This work thus develops upon the critical perspectives of educational historians and social studies educators who have probed this turning point in the history of American schooling It also offers an alternative means of viewing the reality of life in the nation s public institutions
