### **Integrated Water Resources Management in the 21st Century: Revisiting the paradigm** Pedro

Martinez-Santos, Maite M. Aldaya, M. Ramón Llamas, 2014-03-03 Integrated water resources management advocates a coordinated approach for managing water resources in a way that balances social and economic needs with concern for the environment. While potentially useful, integrated water management is also controversial. Supporters believe that the multi-dimensional nature of water can only be understood and managed from a holistic perspective, while critics often argue that integrated water management lacks sufficiently well defined rules for its practical implementation. This book, written by academics, users and practitioners, provides a down-to-earth approach to the ideal of integrated water resources management, drawing from conceptual frameworks and real-life practice to identify the key aspects that are yet to be resolved. As such, it examines the role of water accounting, food trade, environmental externalities and intangible values as key aspects whose consideration may help the water management community move forward. Overall, integrated water resources management is perceived to be a useful utopia whose value lies more in the steps that need to be taken to make it a reality than in achieving its ever-elusive end goal.

### **New Clues for Analysing the HRM Black Box** Alvaro López-Cabrales, Ramon

Valle-Cabrera, 2015-09-04 This book serves to illustrate the difficulty in explaining the role of human resources and the complexities implicit in the management of people working together in various kinds of organisations and more specifically the existing links between the management of human capital and the functioning of the organisation. Several chapters provide an accurate picture of topics and issues that are relevant today in the area of human resource management by bringing together different approaches and levels of analysis that undoubtedly enrich one another. The opening chapters are theoretical reviews and approaches of differing degrees of abstraction that explain the connections between human resources management and the performance of the organization, including such topics as the importance of correctly implementing the processes of human resources management and the role that the Human Resources Department can play in this, the importance of these management practices being interiorised and embedded in the whole organisation and the debate on the effects that management systems based on both control and commitment have on the behaviours of individuals. Delving into the relationship between human resources management and organisational performance, the second part of the book investigates the effect that social networks and work groups have on an organisation's results, the effect of job satisfaction on the differences and disagreements between an organisation and employee with respect to the behaviours expected and finally the measurement of happiness at work with regards to three dimensions: engagement, job satisfaction and affective organisational commitment. These eight chapters were considered the best papers presented at the 9th International Workshop on Human Resources Management held on October 30th-31st 2014 at Pablo de Olavide University, Seville, Spain.
