Answer To Homework Questions

Loren B. Byrne

Answer To Homework Questions:

Learner-Centered Teaching Activities for Environmental and Sustainability Studies Loren B. Byrne, 2016-03-21 Learner centered teaching is a pedagogical approach that emphasizes the roles of students as participants in and drivers of their own learning. Learner centered teaching activities go beyond traditional lecturing by helping students construct their own understanding of information, develop skills via hands on engagement and encourage personal reflection through metacognitive tasks. In addition, learner centered classroom approaches may challenge students' preconceived notions and expand their thinking by confronting them with thought provoking statements, tasks or scenarios that cause them to pay closer attention and cognitively see a topic from new perspectives. Many types of pedagogy fall under the umbrella of learner centered teaching including laboratory work, group discussions, service and project based learning and student led research among others. Unfortunately, it is often not possible to use some of these valuable methods in all course situations given constraints of money, space, instructor expertise, class meeting and instructor preparation time and the availability of prepared lesson plans and material. Thus a major challenge for many instructors is how to integrate learner centered activities widely into their courses. The broad goal of this volume is to help advance environmental education practices that help increase students' environmental literacy. Having a diverse collection of learner centered teaching activities is especially useful for helping students develop their environmental literacy because such approaches can help them connect more personally with the material, thus increasing the chances for altering the affective and behavioral dimensions of their environmental literacy. This volume differentiates itself from others by providing a unique and diverse collection of classroom activities that can help students develop their knowledge, skills and personal views about many contemporary environmental and sustainability issues.

Virtual Reference Services Stacey Kimmel, Jennifer Heise, 2016-02-02 A state of the art guide to virtual reference services. This essential book provides a snapshot of virtual reference (VR) services in all kinds of library settings and discusses the issues, trends and practices involved in offering this kind of service. The chapters go beyond descriptions of services to offer practical advice and suggestions for product selection, policy setting, technical support, collaborative efforts, staffing, training, marketing, budgeting, evaluation and administration. Case studies, relevant Web sites and vendor information are included. An ample selection of tables, figures and illustrations makes important information easy to access and understand. From the editors: The purpose of this book is to describe the state of the art in virtual reference services by which we mean real time interactive reference service with a librarian offered online via chat or videoconferencing. Significant players in virtual reference services have prepared chapters for this book. Some of these address virtual reference as a service trend. Others describe services in a variety of settings including public, academic and special libraries. Some focus on one aspect of virtual reference such as statistics, evaluation, policy setting or the reference interaction. Our intent is to provide an opportunity for reflection on the impact of virtual reference services on librarians.
