The answers for the exercises in Chapters 12 through 19 were produced in the following way. In exercises where the statistics are provided in the question or in Appendix A, the solutions were produced manually. The solutions to exercises requiring the use of a computer were produced using Excel. When the test result was calculated manually and the test statistic is normally distributed (or statistics), the  $p$ -value was computed manually using the normal table (Table I in Appendix B). The  $p$ -value for all other test statistics was determined using Excel.
