Thi Hong Thanh,2013-11-27 During the last two decades Confucian heritage culture countries have widely promoted  
teaching and learning reforms to advance their educational systems To skip the painfully long research stage Confucian  
heritage culture educators have borrowed Western philosophies and practices with the assumption that what has been done  
successfully in the West will produce similar outcomes in the East The wide importation of cooperative learning practices to  
Confucian heritage culture classrooms recently is an example However cooperative learning has been documented in many  
studies not to work effectively in Confucian heritage culture classrooms The reason is that the educators often impose this  
instructional method on the students without a careful consideration of its appropriateness in the socio cultural context of  
Confucian heritage culture countries This procedure is not effective and professional because learning does not stand alone  
Rather it is shaped and influenced by other factors including teaching methods learning tasks assessment demands workload  
and the learning culture of students in the local context For cooperative learning to work effectively in Confucian heritage  
culture classrooms reformers need to consider the importation of this approach in line with a careful examination of all  
supports and constraints that affect those factors that are associated with learning The volume provides an applied  
theoretical framework and culturally appropriate and practical instructions that could assist Confucian heritage culture  
educators and teachers to address various factors at multiple levels in order to optimize success in importing cooperative  
learning to their classrooms Overall it provides strategies to assist Confucian heritage culture teachers to change their  
teaching practices redesign lessons plans design assessment methods and organize learning activities in a manner that can  
influence Confucian heritage culture students to shift from employing teacher centered learning approaches to cooperative
