Urban and Regional Data Management Claire Ellul, Sisi Zlatanova, Massimo Rumor, Robert Laurini, 2013-05-23 The Urban Data Management Society has organised international symposia at various locations throughout Europe since 1971 and UDMS 2013 marks its second visit to London. From its outset UDMS has highlighted changes and trends in urban data and urban data management. However, the rate of emergence of new data and new technologies has never been as rapid as it is now. Trends including smart cities, smart phones, social media, 3D modelling, volunteered geographic information, building information modelling, and the internet of things all generate information about the urban environment and the people who live there. Additionally, the volume of data generated in part through such techniques has in turn resulted in research into big data: how best to handle the data, analyse it, visualise it in different contexts. Thus the challenges and opportunities facing those working with these new types of urban data are manifold. Given this, the general theme for UDMS 2013 was Recent and Emerging Trends in the Management of New Urban Data. This book contains 20 papers selected from the long papers that were submitted for UDMS 2013. Each paper was reviewed by three independent academic reviewers from around the world, both for academic quality and for clarity in communication. The book is intended to be suitable for different readers: from city planners and architects to academics, students and policy makers, and those involved in urban planning. **The Handy Dinosaur Answer Book** Thomas E. Strengthening and retrofitting are major themes in this volume with NDT and electrochemical repair following closely, discussing the latest advances and technologies in concrete repair. The book brings together some interesting and challenging theoretical approaches and questions if we really understand and approach such topics as corrosion monitoring correctly. Concrete Solutions is an essential reference work for those working in the concrete repair field, from engineers to architects and from students to clients. The Concrete Solutions Series of international conferences on concrete repair began in 2003 with a conference held in St Malo, France, in association with INSA Rennes. Subsequent conferences have seen the Series partnering with the University of Padua, Italy, in 2009; with TU Dresden, Germany, in 2011; and with Queen's University Belfast, Northern Ireland, in 2014. In 2016 Thessaloniki, Greece, hosted the conference, partnering with both Aristotle University of Thessaloniki (AUTH) and Democritus University of Thrace (DUTH).

The next conference in the series will be held in 2019 in Istanbul
