**for the guidance of teachers**

**9702 PHYSICS**

**9702/22**

Paper 2 (AS Structured Questions), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

## **2max Papers 9702:**

*Handbook of Industrial Chemical Additives* Michael Ash, 1991 Contains over 18 000 entries for chemical trademark products currently sold throughout the world      *Chemical Products Desk Reference* Michael Ash, 1990 There is hardly a technical library in the world in which the volumes of the Chemical Formulary Volumes 1-34 do not occupy a prominent place. It does not duplicate any of the formulas included in previous volumes but lists a wide array of modern and salable products from all branches of the chemical industries. An excellent reference for formulation problems. Contents: I Introduction II Adhesives III Beverages and Foods IV Cosmetics V Coatings VI Detergents VII Drugs VIII Metal Treatments IX Polishes X Elastomers Polymers and Resins XI Miscellaneous Appendix Index Preface. Chemistry as taught in our schools and colleges concerns chiefly synthesis, analysis and engineering and properly so. It is part of the right foundation for the education of the chemist. Many a chemist entering an industry soon finds that most of the products manufactured by his concern are not synthetic or definite complex compounds but are mixtures, blends or highly complex compounds of which he knows little or nothing. The literature in this field if any may be meager, scattered or obsolete. Even chemists with years of experience in one or more industries spend considerable time and effort in acquainting themselves with any new field which they may enter. Consulting chemists similarly have to solve problems brought to them from industries foreign to them. There was a definite need for an up to date compilation of formulae for chemical compounding and treatment. Since the fields to be covered are many and varied an editorial board of chemists and engineers engaged in many industries was formed. Many publications, laboratories, manufacturing firms and individuals have been consulted to obtain the latest and best information. It is felt that the formulas given in this volume will save chemists and allied workers much time and effort.
