Advances in Harmonic Analysis and Partial Differential Equations Donatella Danielli, Irina Mitrea, 2020-04-09 This volume contains the proceedings of the AMS Special Session on Harmonic Analysis and Partial Differential Equations held from April 21-22, 2018 at Northeastern University Boston Massachusetts. The book features a series of recent developments at the interface between harmonic analysis and partial differential equations and is aimed toward the theoretical and applied communities of researchers working in real complex and harmonic analysis, partial differential equations and their applications. The topics covered belong to the general areas of the theory of function spaces, partial differential equations of elliptic, parabolic and dissipative types, geometric optics, free boundary problems and ergodic theory and the emphasis is on a host of new concepts, methods and results.

More Human Steve Hilton, Jason Bade, Scott Bade, 2015-05-21 Both campaigns are treating people like simpletons. In *More Human* read the truth about Brexit from someone who really knows. In this powerful manifesto Steve Hilton argues that the frustrations people feel with government politics, their economic circumstances and their daily lives are caused by deep structural problems with the systems that dominate our modern world: systems that have become too big, bureaucratic and distant from the human scale. He shows how change is possible, offering us a more human way of living.

Moving the Needle on Children's Physical Activity - How to Best Promote More Movement? Mirko Brandes, Jennifer Sacheck, 2024-07-24 Globally, physical inactivity is on the rise in most countries and according to the WHO it is considered one of the leading major public health risks. As children's physical activity behaviors are conveyed into adulthood, many interventions focus on establishing healthy physical activity habits in children to prevent the potential negative health outcomes associated with low physical activity over the life course. The school environment provides an opportunity to reach the majority of children; however, physical activity promotion in schools can often be a challenge. Barriers to the success of physical activity interventions include the physical, social and economic environment, competencies and workload of teachers, as well as the perception that physical activity may interfere with the primary task of schools, which is education. Moreover, the evaluation of physical activity interventions for children is challenging, raising a discussion on how to best evaluate these interventions.

An Age of Accountability John L. Rury, 2023-10-13 *An Age of Accountability* highlights the role of test-based accountability as a policy framework in American education from 1970 to 2020. For more than half a century, the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment. The theory of change embedded in almost all test-based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools. This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps, which repeatedly failed to materialize. But even after very clear disappointments, no other policy framework has emerged to challenge its hegemony. The American public today has

little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree
