ratification of the Harkin Engel Protocol in 2001 to eliminate child labour in the cocoa sectors of Côte d'Ivoire and Ghana the latest progress report shows child labour in this sector is increasing rather than decreasing Sadhu et al 2020 This trend is concerning given the detrimental effects of child labour on children's lives education and health and the perpetuated cycle of poverty as a result To break this trend it is necessary to expand and improve current methods of tracking the incidence of child labour monitoring and explore more sustainable ways to support rural families to keep children out of child labour prevention To that end technology digitalization and digital innovations have a role in poverty reduction and improving living standards in developing countries however political and socio economic problems can hinder these technological fixes With smallholder cocoa producers being the most vulnerable actors within this value chain the implementation of technological monitoring systems is not a clear cut route Participation and engagement depend not only on the perception of the advantages to farmers and community but also on issues that impact the adoption and use of information and communication technologies ICT For example availability affordability and literacy and effective use
