**Women's Work** Jennifer Moore, 2025-03-11 When women have full socioeconomic citizenship as well as equitable and respectful partnerships with men transformative justice can be sustained in postconflict societies In *Women's Work* Jennifer Moore presents a reimagined theory of peacebuilding and transformative justice based on the experiences and insights of women farmers and microentrepreneurs who lived through protracted civil conflicts drawing on seven years of interviews with women activists across ten communities five in the Acholi region of Northern Uganda and five in the Moyamba and Koinadugu Districts of Sierra Leone Despite the important differences between the preconflict and conflict histories and demographics of the two countries Moore finds commonalities in the practical yet visionary approaches to community life emerging from the core values daily activities and long range goals shared by rural cooperative members in both regions Collective survival communal healing and conflict resolution define the rhythm of these women's daily lives as they go about building peace piecemeal They reject punitive retribution models and demand instead a peacebuilding model that advocates for advances in material well being the acknowledgment of state accountability for community suffering and reconciliation and restoration of community networks But most important Moore amplifies these women's voices when they

insist that legal equality for women and healthy partnerships between women and men are also essential components to enduring transformation of their societies Moore theorizes what peacebuilding look like if it were modeled on these women led matriarchically structured communities that proved not only to be effective at holding governments accountable but also to have the capacity to feed their people and revitalize their local economies Women s Work shows that when women have full socioeconomic citizenship as well as equitable and respectful partnerships with men transformative justice can be sustained through the arts of collective livelihood violence free conflict management and celebration National Journal ,2000 **A Companion to Heritage Studies** William Logan,Máiréad Nic Craith,Ullrich Kockel,2015-08-10 A Companion to Heritage Studies is a comprehensive state of the art survey of the interdisciplinary study of cultural heritage Outlines the key themes of research including cultural preservation environmental protection world heritage and tourism ethics and human rights Accessibly organized into a substantial framework setting essay by the editors followed by three sections on expanding using and abusing and recasting heritage Provides a cutting edge guide to emerging trends in the field that is that is global in scope cross cultural in focus and critical in approach Features contributions from an international array of scholars including some with extensive experience in heritage practice through UNESCO World Heritage Centre ICOMOS and national heritage systems **Journal of the American Veterinary Medical Association** American Veterinary Medical Association,2017 Youth worker education in Europe Marti Taru,Ewa Krzaklewska,2020-07-02 Youth work coupled with effective government policies is invaluable in ensuring that young people are given the opportunity to acquire the knowledge skills and attitudes they need for civic engagement and social action Youth work is experiencing a policy momentum at European level Since the adoption of a resolution on the subject by the Committee of Ministers of the Council of Europe in 2017 youth work is back on the core agenda of the Council of Europe and the European Union youth strategies This book looks at how youth work practitioners learn their trade what formal and non formal education offers exist and how education is contextualised in the broader picture of youth work recognition Starting with the premise that formal education entails a series of steps from which youth work practitioners would benefit this books explores that picture through a mapping study and delves further into its findings through thematic contributions The results of the research and debates with policy makers researchers practitioners educators and other stakeholders identifies a field of growing opportunities across Europe The situation of youth workers in different countries varies from advanced practice architectures for youth worker education to those in need of development Youth worker education however is not only about the education and training offers it is also about financial and organisational resources legislation support systems competence frameworks quality standards ethical frameworks and guidance This book aims to support youth work so that it becomes more visible and evolves into a recognised field of practice among other occupations and professions engaging with young people **Ethiopia Year Book ...** , **Politics and International Relations in Eurasia** Stylianos A. Sotiriou,2019-03-28 Eurasia has long been

characterized by intense competition among populations and among States The collapse of the Soviet Union constituted a critical juncture in the region s course since informal and formal norms subsided giving rise to a hardly regulated socio political environment where survival and security considerations ranked atop In this context populations first and foremost sought to have their existence guaranteed within nation states While in most cases that transition was accomplished without major impediments in the cases of Moldova Ukraine Georgia and Azerbaijan major challenges have been encountered leaving their mark deep in the post soviet course of the newly independent republics Moldova has been rattled by the conflict in Transdnistria Ukraine by the conflict in Crimea Georgia by the conflict in South Ossetia and Abkhazia and Azerbaijan by the conflict in Nagorno Karabakh In fact these conflicts have been classified as frozen conflicts given their unsettled nature and the smoldering fire between opposing populations within the respective republics This intense competition however has not been constrained only to the domestic level and only to the issue of frozen conflicts Eurasia s energy prospects have also been the cause of a constant power struggle among the States of the region With the Caspian Sea to constitute a rich in natural resources hub a clash of interests has taken place among the littoral States Moreover this competition has acquired a much broader geopolitical dimension extending to Eurasia s two ends the European Union and China As a result Eurasia s underbelly has become an area where the maximization of power figures as the best guarantee of survival and security in a fully unregulated environment Taken together frozen conflicts domestic level and energy politics international level stand out as the two main features of Eurasia both unfolding in comparable conditions Therefore the book presents them as a two level game aiming at offering better substantiated explanations that draw on the very fundamentals of political science and at building a bridge of communication between the two levels that allows for well informed and widely applicable policy implications
