Department of the Army, 1963 **Military Review**, 2013 Professional Journal of the United States Army, 2013 **Controlling Sex in Captivity** Matthias Reiss, 2018-06-14 Controlling Sex in Captivity is the first book to examine the nature extent and impact of the sexual activities of Axis prisoners of war in the United States during the Second World War Historians have so far interpreted the interactions between captors and captives in America as the beginning of the post war friendship between the United States Germany and Italy Matthias Reiss argues that this paradigm is too simplistic Widespread fraternisation also led to sexual relationships which created significant negative publicity and some Axis POWs got caught up in the U S Army s new campaign against homosexuals By focusing on the fight against fraternisation and same sex activities this study treads new ground It stresses that contact between captors and captives was often loaded with conflict and influenced by perceptions of gender and race It highlights the transnational impact of fraternisation and argues that the prisoners sojourn in the United States also influenced American society by fuelling a growing concern about social disintegration and sexual deviancy which eventually triggered a conservative backlash after the war **Military Neuroscience and the Coming Age of Neurowarfare** Armin Krishnan, 2016-10-04 Krishnan describes military applications of neuroscience research and emerging neurotechnology with relevance to the conduct of armed conflict and law enforcement This work builds upon literature by scholars such as Moreno and Giordano and fills an existing gap not only in terms of reviewing available and future neurotechnologies and relevant applications but by discussing how the military pursuit of these technologies fits into the overall strategic context The first to sketch future neurowarfare by looking at its potentials as well as its inherent limitations this book s main theme is how military neuroscience will enhance and possibly transform both classical psychological operations and cyber warfare Its core argument is that nonlethal strategies and tactics could become central to warfare in the first half of the twenty first century This creates both humanitarian opportunities in making war less bloody and burdensome as well as some unprecedented threats and dangers in terms of preserving freedom of thought and will in a coming age where minds can be manipulated with great precision *Your Federal Income Tax for Individuals*, 2014 **Tomerong Anzacs "I've had my fling"** Raymond Blair, 2021-01-01 Following Tomerong Public School s sesquicentenary in 2012 and the centenary of the Gallipoli landings in 2015 further research was conducted on the students who were listed on the School s Memorial Inevitably this led to more names being added This document covers those on the memorial plus others who had a connection to the village Research is continuing More information on Tomerong s history is available at <https://tomeronghistory.com> *Your Federal Income Tax for Individuals* United States.
