Exploring Biology in the Laboratory: Core Concepts Murray P. Pendarvis, John L. Crawley, 2019-02-01 Exploring Biology in the Laboratory Core Concepts is a comprehensive manual appropriate for introductory biology lab courses. This edition is designed for courses populated by nonmajors or for majors courses where abbreviated coverage is desired. Based on the two semester version of Exploring Biology in the Laboratory 3e this Core Concepts edition features a streamlined set of clearly written activities with abbreviated coverage of the biodiversity of life. These exercises emphasize the unity of all living things and the evolutionary forces that have resulted in and continue to act on the diversity that we see around us today.

Transactions on Edutainment IV Xiaopeng Zhang, 2010-08-28 E learning and digital entertainment techniques tools and systems are becoming popular and can be found in many real world educational applications in many countries. The driving force behind these technologies is the rapidly growing requirements of edutainment especially from the perspective of the users. This has led to the increasing interest of researchers in this area. The articles in this issue give a rich overview of how edutainment technologies can be creatively used for training and education purposes. The first 12 articles of this issue represent a selection of outstanding contributions from Edutainment 2010 the 5th International Conference on E learning and Games held in Changchun China in August 2010. The main purpose of this event is to facilitate the discussion presentation and information exchange on the scientific and technological developments in the emerging field of digital entertainment techniques and systems for education. These 12 papers concentrated on three aspects e learning system and applications game techniques for learning and virtual reality techniques for entertainment. They are closely related to the topics of this journal.

The Animal Experimentation Debate David E. Newton, 2013-05-09 Reviewing the topic from antiquity to the present day this book examines the debate over the use of animals in research in a fair and balanced way. The debate over the use of nonhuman animals in experimental research has gone on for centuries and it continues as vigorously today as it ever has. In fact in the last decade the controversy has intensified making animal testing a topic at the highest level of debate of any socioscientific issue in the United States. This book presents all sides of the issue so that readers can come to their own conclusions as to the morality and validity of animal experimentation and provides biographies of individuals and descriptions of organizations that have been involved in the debate over the centuries. Additionally it documents the historical shift in thinking that made animal experimentation commonplace between the time of the ancient Greeks and the 19th century to the mindset of some who argue for an end to the practice and alternative ways of conducting medical experimentation to benefit human health.
