**Guide to the Library of Congress Classification** Lois Mai Chan, Sheila S. Intner, Jean Weihs, 2016-09-26 Like earlier editions this thoroughly updated sixth edition of the classic textbook provides readers with a basic understanding of the Library of Congress Classification system and its applications. The Library of Congress Classification system is used in academic, legal, medical, and research libraries throughout North America as well as worldwide. Accordingly, catalogers and librarians in these settings all need to be able to use it. The established gold standard text for Library of Congress Classification, LCC, the sixth edition of Guide to the Library of Congress Classification updates and complements the classic textbook's coverage of cataloging in academic and research libraries. Clear and easy to understand, the text describes the reasoning behind assigning subject headings and subheadings, including use of tables, explains the principles, structure, and format of LCC details notation tables, assigning class numbers and individual classes, and covers classification of special types of library materials. The last chapter of this perennially useful resource addresses the potential role of classification in libraries of the future.

**The Car Hacker's Handbook** Craig Smith, 2016-03-01 Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost open-source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to build an accurate threat model for your vehicle, reverse engineer the CAN bus to fake engine signals, exploit vulnerabilities in diagnostic and data logging systems, hack the ECU and other firmware and embedded systems, feed exploits through infotainment and vehicle-to-vehicle communication systems, override factory settings with performance tuning techniques, build physical and virtual test benches to try out exploits safely. If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

**Climate Change and Aviation** Stefan Gossling, Paul Upham, 2012-05-04 This is a timely, challenging, and fascinating book on a topic of central importance to the success or otherwise of our climate change policies. It sets down a clear marker for what has to be done in the aviation sector. Professor John Whitelegg, Stockholm Environment Institute, University of York, UK. Climate Change and Aviation presents a clear picture of the transport sector's greatest challenge: how to reconcile aviation's immense popularity with its considerable environmental damage and its dependence on liquid hydrocarbon energy sources. This book avoids wishful thinking and takes the much harder but more

productive path of considering difficult solutions that clash with short term and short sighted expectations about the unlimited growth potential for flying Professor Anthony Perl Urban Studies Program Simon Fraser University Canada A convincing and timely collection that brings together an impressive range of expertise The book integrates various perspectives into a powerful core argument we must do something and quickly to tackle the impact of aviation on our environment The authors recognise the political difficulties associated with promoting change but present constructive options for policy makers Required reading especially for transport ministers set on promoting the growth of air travel Professor Jon Shaw Director of the Centre for Sustainable Transport University of Plymouth UK Trends such as the massive growth in availability of air travel and air freight are among those which have led to aviation becoming one of the fastest growing emitters of greenhouse gases These trends have also caused a shift in expectations of how we do business where we go on holiday and what food and goods we can buy For these reasons aviation is and is set to stay high up on global political organizational and media agendas This textbook is the first to attempt a comprehensive review of the topic bringing together an international team of leading scientists Starting with the science of the environmental issues it moves on to cover drivers and trends of growth socio economics and politics as well as mitigation options the result being a broad yet detailed examination of the field This is essential reading for undergraduate and postgraduate courses in transport tourism the environment geography and beyond while also being a valuable resource for professionals and policymakers seeking a clear understanding of this complex yet urgently pressing issue
