Huff,1969 **SUMMARY - How To Lie With Statistics By Darrell Huff** Shortcut Edition,2021-06-01 Our summary is short simple and pragmatic It allows you to have the essential ideas of a big book in less than 30 minutes By reading this summary you will learn how to defend yourself against the misused statistics that litter our daily lives You will also learn the importance of statistical samples to be wary of missing data how to identify misleading graphs how to manipulate statistical jargon to your advantage what questions to ask

yourself to avoid falling into the trap set by certain statistics. Statistics are very useful but they can be misused to sell a product, convince voters or attract attention. For example, a local newspaper with its focus on crime may make its readers believe that they live in a dangerous place and a study explaining that after ingesting a certain medication, colds tend to disappear, may make people buy a product that is as effective as no treatment at all. Statistics have the devious advantage of appearing factual, which is what makes them attractive but in the mouth of a dishonest person, they can fool even the most discerning readers. This book serves not as an instruction manual for crooks but as a self-defense manual for their potential victims, honest people.
