

APES 2021 #1 (Set 1) FRQ-Aligned Multiple Choice Questions - KEY

Many justifications for each correct multiple choice question can be found within the Chief Reader Report and Sample Student Responses found [here](#).

1. Which response below would earn the FRQ point?
 - a. The independent variable is the compass direction the PV panels are facing.
 - b. The independent variable of the experiment will be the sun or amount of light that is being measured.
 - c. The independent variable is the PV panels.
 - d. The independent variable in the experiment would be the amount of sunshine in the location per day or the time of year.
2. Which response below would earn the FRQ point?
 - a. The dependent variable is the facing direction, how much electricity in kWh is produced.
 - b. The amount of electricity produced in kWh.
 - c. The dependent variable is the position or direction of the panels that will change.
 - d. The dependent variable is the amount of solar energy the panels receive during this experiment.
3. Which response below would **NOT** earn the FRQ point?
 - a. A reasonable hypothesis for this experiment would be that the panels will be able to produce the most amount of electricity when facing the sun rises from which would be the east.
 - b. If the panels face either east or west then the amount of electricity generated will increase because the sun rises and sets in those directions.
 - c. If the PV panels are installed on a roof in the northern hemisphere, the greatest amount of electricity produced will be when facing south.
 - d. If you install photovoltaic panels on a roof of a house, will it help provide electricity for the home?
4. Which response below would earn the FRQ point?
 - a. One variable that could affect the results of the study is weather. The amount of cloud cover could heavily change energy output.
 - b. One variable that could change the results of the study that was not discussed was the weather and how it can affect the amount of exposure the solar panels have to light.
 - c. One variable that isn't discussed is the amount of condensation and precipitation in the area. This can affect the results because clouds block sunlight so areas with more clouds would generate less electricity.
 - d. The weather could affect the results of the study because if the sky is overcast then the solar panels will receive less sun due to the clouds blocking the sun.
5. Which response below would **NOT** earn the FRQ point?
 - a. The turbine is the location of the hydroelectric dam where water's kinetic energy turns into mechanical energy.
 - b. Kinetic energy turns to mechanical energy at the generator.
 - c. Kinetic energy turns to mechanical energy in the turbine section of the generator.
 - d. Turbine
6. Which response below would **NOT** earn the FRQ point?
 - a. By being higher in elevation it stores potential energy that can be converted to kinetic energy to power the turbine when released downhill.
 - b. The water in the storage reservoir contains a lot of water being contained at a higher altitude than where the turbine is. As gravity pulls down the water from potential to kinetic energy, this increases the rate at which electricity is generated.
 - c. It has potential energy because the water from there creates kinetic energy and then that kinetic energy is turned to mechanical energy.
 - d. Water in the storage has potential energy because it is above the generator. Gravity gives it its potential energy when it comes down.

Is the Language Faculty Non Linguistic? Umberto Ansaldi, N. J. Enfield, 2016-08-15 A line of research in cognitive science over several decades has been dedicated to finding an innate language specific cognitive system a faculty which allows human infants to acquire languages natively without formal instruction and within short periods of time In recent years this search has attracted significant controversy in cognitive science generally and in the language sciences specifically Some maintain that the search has had meaningful results though there are different views as to what the findings are ranging from the view that there is a rich and rather specific set of principles to the idea that the contents of the language faculty are while specifiable in fact extremely minimal But other researchers rigorously oppose the continuation of this search arguing that decades of effort have turned up nothing The fact remains that the proposal of a language specific faculty was made for a good reason namely as an attempt to solve the vexing puzzle of language in our species Much work has been developing to address this and specifically to look for ways to characterize the language faculty as an emergent phenomenon i e not as a dedicated language specific system but as the emergent outcome of a set of uniquely human but not specifically linguistic factors in combination A number of theoretical and empirical approaches are being developed in order to account for the great puzzles of language language processing language usage language acquisition the nature of grammar and language change and diversification This research topic aims at reviewing and exploring these recent developments and establishing bridges between these young frameworks as well as with the traditions that have come before The goal of this Research Topic is to focus on current developments in what many regard as a paradigm shift in the language sciences In this Research Topic we want to ask If current explicit proposals for an innate dedicated faculty for language are not supported by data or arguments how can we solve the problems that UG was proposed to solve Is it possible to solve the puzzles of language in our species with an appeal to causes that are not specifically linguistic
