

An artistic photograph of two bright yellow birds, possibly weavers, perched on a dark, textured branch. They are actively building a nest using long, thin blades of green grass. The birds are positioned on the left side of the frame, with their bodies and wings partially visible as they work. The background is a solid, deep black, which makes the vibrant yellow of the birds and the green of the grass stand out prominently. The lighting is focused on the birds and their nest, creating a sense of depth and highlighting the textures of the feathers and the grass.
