AQA A-level Biology Year 2 Topics

- **Energy transfers in and between organisms**
- **Organisms respond to changes in their internal and external environments**
- **Genetics, populations, evolution and ecosystems**
- **The control of gene expression**

This Answers document provides suggestions for some of the possible answers that might be given for the questions asked in the Workbook. They are not exhaustive and other answers may be acceptable, but they are intended as a guide to give teachers and students feedback. There is a range of question types, testing all aspects of the second year of A-level. Initial questions require basic knowledge and recall. Subsequent questions test the application of knowledge to a wide range of biological situations.

Exam-style question answers

Assessment objectives (AOs), which are set by Ofqual, are the same across all A-level Biology specifications. The objectives become progressively rigorous. The exam questions test whether the following assessment objectives have been achieved:

- AO1 questions test knowledge and understanding of scientific ideas, processes, techniques and procedures.
- AO2 questions test application of knowledge and understanding of scientific ideas, processes, techniques and procedures. This AO is tested in different contexts: theoretical, practical, qualitative and quantitative.
- AO3 questions test analysis, interpretation and evaluation of scientific information, ideas and evidence. Students should be able to formulate judgements and conclusions, and suggest improvements to practical designs and procedures.

Mathematical skills comprise 10% of A-level biology, while at least 15% assesses knowledge and skills linked to practical work.
