Fymat, 2018-11-14 While many African countries lag behind the rest of the industrialised world in scientific and medical research and development the situation is progressively improving This is why the Society for the Advancement of Science in Africa was established to contribute to economic advancement and sustainability through science research education and innovation This book provides a selection of papers from the Advancement of Science in Africa s fourth annual conference The conference was held under the overarching theme of science technology and innovation in Africa with several important sub themes including but not limited to improving health research and disease surveillance education collaborating in research responding to epidemic diseases with high mortality in Africa and promoting women s interest in science careers The collection illustrates how although the chapter contributors come from various countries and universities representing their own academic research they all share a common interest in advancing science technology and innovation in Africa **Issues of Governance, Security, and Development in Contemporary Africa** Mohamed Saliou Camara, Alem Hailu, Sabella O. Abidde, 2023-12-15 Governance security and development are three critical components of a dialectical nexus that is both dominant and determinant for any objective and fruitful quest for the understanding of the trajectory of a country a region or in the case of Africa a continent from a colonial past to a neocolonial and meta colonial present and toward a future of

strategic optimal independence and self reliance That colonial past and the ensuing neocolonial and meta colonial present have made these critical components and the dialectical nexus that they form particularly challenging for the African continent For this reason Issues of Governance Security and Development in Contemporary Africa offers an in depth interdisciplinary analysis of the challenges that contemporary Africa faces within these critical areas as well as the resources and prospects that the continent possesses and can leverage to overcome the said challenges Using case studies involving a range of countries across the continent Mohamed Saliou Camara Alem Hailu and Sabella O Abidde argue that Africa needs to decolonize the terms of reference that guide its nation building statecraft and national development agenda in ways that will facilitate the establishment of viable systems of governance and security and the promotion of genuine development
