2014 Trials Papers Life Sciences Eastern Cape:

Diverse Excursions in the Southeast: Paleozoic to Present Ann E. Holmes, 2015-03-09 This volume contains field guides to the 2015 GSA Southeastern Section Meeting's field trips. The guides explore geologic history and visit four regional geologic provinces: the Nashville dome, Blue Ridge Valley and Ridge, and Cumberland Plateau. Global Visions of Violence Jason Bruner, David C. Kirkpatrick, 2022-12-09 In *Global Visions of Violence* the editors and contributors argue that violence creates a lens, bridge, and method for interdisciplinary collaboration that examines Christianity worldwide in the twentieth and twenty-first centuries. By analyzing the myriad ways violence, persecution, and suffering impact Christians and the imagination of Christian identity globally, this interdisciplinary volume integrates the perspectives of ethicists, historians, anthropologists, and ethnographers to generate new conversations. Taken together, the chapters in this book challenge scholarship on Christian growth that has not accounted for violence while analyzing persecution narratives that can wield data toward partisan ends. This allows *Global Visions of Violence* to push urgent conversations forward, giving voice to projects that illuminate wide and often hidden landscapes that have been shaped by global visions of violence and seeking solutions that end violence and turn toward the pursuit of justice, peace, and human rights among suffering Christians. Global Application of Prescribed Fire John R. Weir, J. Derek Scasta, 2022-02 *Global Application of Prescribed Fire* provides a first-hand perspective of the various methods and ways people around the world view and use prescribed fire. It covers the logistics, constraints, and social dynamics surrounding the intentional use and application of fire by humans and demonstrates how, why, when, and where prescribed fire is used in different regions. Written by international experts, the book has four key objectives: explore new techniques, ideas, and thoughts on how to apply prescribed fire from a global perspective; provide regional case studies covering issues that may constrain or enhance prescribed fire projects; stimulate cross-cultural conversations about how fires function in ecosystems and relate prescribed fire to wildfire regimes with implications for protecting life and property as well as sustaining local fire cultures and unique fire-dependent flora and fauna. *Global Application of Prescribed Fire* enhances our understanding and knowledge about the application of prescribed fire. This comprehensive book will provide fire practitioners, researchers, agencies, and policymakers with key ecological and managerial insight of how prescribed fires are conducted around the globe. **The Politics of Potential** Michelle Pentecost, 2024-01-12 The first one thousand days of human life or the period between conception and age two is one of the most pivotal periods of human development. Optimizing nutrition during this time not only prevents childhood malnutrition but also determines future health and potential. *The Politics of Potential* examines early life interventions in the first one thousand days of life in South Africa, drawing on fieldwork from international conferences, government offices, health care facilities, and the everyday lives of fifteen women and their families in Cape Town. Michelle Pentecost explores various aspects of a politics of potential, a term that underlines the first one thousand days concept and its effects on clinical care and the lives of childbearing women in South Africa. Why was the First

One Thousand Days project so readily adopted by South Africa and many other countries Pentecost not only explores this question but also discusses the science of intergenerational transmissions of health disease and human capital and how this constitutes new forms of intergenerational responsibility The women who are the target of first one thousand days interventions are cast as both vulnerable and responsible for the health of future generations such that despite its history intergenerational responsibility in South Africa remains entrenched in powerfully gendered and racialized ways
