Principles of Clinical Medicine for Space Flight Michael R. Barratt, Ellen S. Baker, Sam L. Pool, 2020-01-02 In its first edition *Principles of Clinical Medicine for Space Flight* established itself as the authoritative reference on the contemporary knowledge base of space medicine and standards of care for space flyers. It received excellent notices and is used in the curricula of civilian and military training programs and used as a source of questions for the Aerospace Medicine Certifying Examination under the American Board of Preventive Medicine. In the intervening few years the continuous manning of the International Space Station has both strengthened existing knowledge and uncovered new and significant phenomena related to the human in space. The Second Edition incorporates this information. Gaps in the first edition will be addressed with the addition of new and revised chapters. This edition is extensively peer reviewed and represents the most up to date knowledge.

Nimble Baba Prasad, 2015-04-24 The world today can be best described by one word: turbulence. As change rages all around how can you, as an individual or as an organization, take advantage of unexpected opportunities and succeed in difficult circumstances? In a book that challenges traditional notions of strategy, Baba Prasad draws on his research at some of the world's best business schools to show how intelligence can help you and your business navigate this maelstrom. The Intelligence Framework presented in *Nimble* goes beyond the common management concept of agility; it presents an immensely practical and hands-on approach for companies and individuals to develop five kinds of intelligences and apply them in different settings for maximum benefit. Bridging strategy, leadership, and innovation and with vivid illustrations, *Nimble* provides a path-breaking assessment methodology and a systematic four-step approach that every company and individual can use to lead amid turbulence.

Shared Governance for Sustainable Working Landscapes Timothy M. Gieseke, 2016-08-05 Sustaining our agricultural landscapes is no longer just a technical, scientific, or even political problem; but it has evolved into a socially complex, so-called wicked problem of conflicting social governance and economics. This creates an extreme economic obstacle where the value of ecosystem services remains low and diffuse and the transaction costs remain high and multiple. Using Uber-like business platform technology and a shared governance model, a symbiotic demand for environmental benefits is created. Enabling multi-sector transactions for environmental benefits, this platform innovation would remedy the tragedy of the commons, the economic nemesis to achieving landscape sustainability. In a nutshell, to sustain our agricultural landscapes, a transdisciplinary approach supported by a shared governance model housed within a multi-sided platform is needed. This book introduces an assessment framework identifying governance actors, styles, and ratios for socio-ecological systems. The assessment uses a new governance compass to identify the types of actors completing which tasks and identifies the styles of governance used to complete the tasks. It is aimed at anyone involved in sustainability science, agricultural policy planning, or integrated landscape design.

Slick Royce Kurmelovs, 2024-07-30 A riveting expose of the global oil industry's multi-decade conspiracy to muddy the waters around the science of climate

change and use the Australian government to undermine worldwide efforts to address environmental devastation. Researched and written by one of Australia's most fearless investigative journalists, Slick reveals how the US petroleum industry was warned about its environmental impacts back in the 1950s and yet went on to build the Australian oil industry which in turn tried to drill the Great Barrier Reef, sought to strongarm governments and joined a global effort to bury the science of climate change and delay action despite knowing the harms it would cause. Slick also tells the stories of fire and flood survivors as well as of the activists engaged in a high risk fight for the future of Australia and of the efforts being made to save ourselves from catastrophe. In this superb in depth work of journalism, Royce Kurlmelovs provides an on the ground examination of how the fossil fuel industry captured Australia and outlines what's at stake for the survival of the planet and our democracy.

The European Union in the 21st Century Nikolaos Zahariadis, 2023-08-24 The European Union in the 21st Century takes a fresh look at a complex and ever changing organization by examining its pursuit of two very different objectives: power, security and political weight and plenty economic growth and social welfare. Nikolaos Zahariadis aims to help students understand these two objectives and how the tension between them affects different issue areas, illuminating how each objective represents a different perspective on what the EU is and what it does. The book also introduces students to the systematic thinking that political scientists employ to see the connections between policies, institutions and actors. By unpacking the various perspectives, students will gain greater insight into how policymakers think and why EU leaders make the kinds of decisions they do.

Technological Innovation in Legacy Sectors William B. Bonvillian, Charles Weiss, 2015-08-18 The American economy misses opportunities for innovation, growth and job creation because of a neglected problem: the resistance to innovation from legacy sectors like energy, manufacturing and health care which constitute most of our economy. The book offers systematic strategies to overcome the structural obstacles to innovation in critically important legacy sectors.

Tripping on Utopia Benjamin Breen, 2024-01-16 A Los Angeles Times Bestseller. One of The New Yorker's best books of 2024. A bold and brilliant revisionist take on the history of psychedelics in the twentieth century, illuminating how a culture of experimental drugs shaped the Cold War and the birth of Silicon Valley. It was not the Baby Boomers who ushered in the first era of widespread drug experimentation. It was their parents. Far from the repressed traditionalists they are often painted as, the generation that survived the second World War emerged with a profoundly ambitious sense of social experimentation. In the 40s and 50s, transformative drugs rapidly entered mainstream culture where they were not only legal but openly celebrated. American physician John C. Lilly infamously dosed dolphins and himself with LSD in a NASA funded effort to teach dolphins to talk. A tripping Cary Grant mumbled into a Dictaphone about Hegel as astronaut John Glenn returned to Earth. At the center of this revolution were the pioneering anthropologists and star-crossed

lovers Margaret Mead and Gregory Bateson Convinced the world was headed toward certain disaster Mead and Bateson made it their life s mission to reshape humanity through a new science of consciousness expansion but soon found themselves at odds with the government bodies who funded their work whose intentions were less than pure Mead and Bateson s partnership unlocks an untold chapter in the history of the twentieth century linking drug researchers with CIA agents outsider sexologists and the founders of the Information Age As we follow Mead and Bateson s fractured love affair from the malarial jungles of New Guinea to the temples of Bali from the espionage of WWII to the scientific revolutions of the Cold War a new origin story for psychedelic science emerges
