2015 Astra Owner Manual:

Aerospace Robotics III Jerzy Sasiadek, 2018-11-11 This book includes extended versions of original works on aerospace robotics presented at the Conference on Aerospace Robotics CARO in Warsaw. It presents recent advances in aerospace robotics such as manipulators which are widely used in space for orbital operations for example the Mobile Servicing System on the International Space Station and the Shuttle Remote Manipulator System. Such manipulators are operated by astronauts and mounted on large platforms making the influence of manipulator motion on the state of the platform insignificant. Application of manipulators for capture maneuvers in unmanned On Orbit Servicing or Active Debris Removal missions requires reliable control algorithms that take into account the free floating nature of the manipulator equipped spacecraft. As such the book presents possibilities for using space manipulators for exploration and a variety of space operations. Further it discusses new methods for the control of autonomous unmanned aerial vehicles UAV using vision systems and sensor fusion methodologies. Such autonomous flying vehicles could be used for materials deliveries and emergencies as well as surveying and servicing

Space Robotics Xiu Tian Yan, Gianfranco Visentin, 2024-12-11 This book

The European Commission set up the Space Robotic Technologies Strategic Research Cluster SRC in its flagship funding programme Horizon 2020 with the goal of enabling major advances in strategic key points of Space Robotics Technologies in order to improve European competitiveness. Space robotics have advanced rapidly in recent years as reflected in recent successful space exploration missions like NASA's successful landing and operation of the Curiosity rover on Mars and the European Space Agency's equally successful landing of its Philae probe on comet 67P Churyumov Gerasimenko. These advances have inspired many young graduates and undergraduates to study space robotics
