[The Art of Classic Planning](#) Nir Haim Buras,2020-01-28 An accomplished architect and urbanist goes back to the roots of what makes cities attractive and livable demonstrating how we can restore function and beauty to our urban spaces for the long term Nearly everything we treasure in the world s most beautiful cities was built over a century ago Cities like Prague Paris and Lisbon draw millions of visitors from around the world because of their exquisite architecture walkable neighborhoods and human scale Yet a great deal of the knowledge and practice behind successful city planning has

been abandoned over the last hundred years not because of traffic population growth or other practical hurdles but because of ill considered theories emerging from Modernism and reactions to it The errors of urban design over the last century are too great not to question The solutions being offered today sustainability walkability smart and green technologies hint at what has been lost and what may be regained but they remain piecemeal and superficial In *The Art of Classic Planning* architect and planner Nir Haim Buras documents and extends the time tested and holistic practices that held sway before the reign of Modernism With hundreds of full color illustrations and photographs that will captivate architects planners administrators and developers *The Art of Classic Planning* restores and revitalizes the foundations of urban planning Inspired by venerable cities like Kyoto Vienna and Venice and by the great successes of L'Enfant's Washington Haussmann's Paris and Burnham's Chicago Buras combines theory and a host of examples to arrive at clear guidelines for best practices in classic planning for today's world *The Art of Classic Planning* celebrates the enduring principles of urban design and invites us to return to building beautiful cities

The Narrative Turn in Urban Planning Lieven Ameen, 2020-11-15 Narratives in the context of urban planning matter profoundly Planning theory and practice have taken an increasing interest in the role and power of narrative and yet there is no comprehensive study of how narrative and concepts from narrative and literary theory more broadly can enrich planning and policy *The Narrative Turn in Urban Planning* addresses this gap by defining key concepts such as story narrative and plot against a planning backdrop and by drawing up a functional typology of different planning narratives In two extended case studies from the planning of the Helsinki waterfront it applies the narrative concepts and theories to a broad range of texts and practices considering ways toward a more conscious and contextualized future urban planning Questioning what is meant when we speak of narratives in urban planning and what typologies we can draw up it presents a threefold taxonomy of narratives within a planning framework This book will serve as an important reference text for upper level students and researchers interested in urban planning
